JAMES BINGHAM WOODWARD.	

* Term expires March, 1883.

REPORT OF THE STATE BOARD OF EDUCATION.

December, 1882.

To the Honorable the Senate and General Assembly of the State of New Jersey:

The State Board of Education herewith submits for your information the annual report of the State Superintendent of Public Instruction, with the accompanying tables. The following is a general summary of the facts contained in his report:

Amount of State school tax \$1,342,656.00, an increase of \$19,916.00 over last year; district and city tax for teachers' salaries and current expenses, \$275,932.45, an increase of \$162.04; district and city tax for permanent improvements, \$366,332.95; from other sources, including State appropriation, interest of surplus revenue, and township school tax, \$157,463.34; the total amount appropriated for maintaining the schools is \$1,776,057.79, and, including the sum voted for building and repairing school houses, the total amount for educational purposes is \$2,142,384.74, an increase over the amount appropriated last year of \$21,534.18.

The total value of school property is \$6,270,778.00, showing a decrease of \$4,289.00 from last year.

The reserve fund being ten per cent. of the total amount of the State school tax was apportioned to the counties by the State Board of Education at a special meeting held on the 2d of March last, as follows:

Atlantic county, \$9,265.16; Bergen, \$4,097.73; Burlington, \$3,381.77; Camden, \$13,391.96; Cape May, \$2,022.38; Cumberland, \$9,882.92; Gloucester, \$1,139.86; Hudson, \$23,394.16; Hunterdon, \$1,699.53; Mercer, \$2,353.52; Middlesex, \$14,364.98; Mon-

mouth, \$7,125.26 ; Morris, \$5,355.96 ; Ocean, \$10,046.96 ; Passaic, \$8,115.68 ; Salem, \$772.93 ; Somerset, \$829.85 ; Sussex, \$7,635.51 ; Union, \$6,113.43 ; Warren, \$3,276.05.

County Superintendents were elected for the following counties, whose terms commenced September 1st, 1882 :

Cumberland, William O. Garrison, re-elected ; Essex, Charles M. Davis, re-elected ; Hunterdon, Oliver H. Hoffman, vice R. S. Swackhamer ; Mercer, William J. Gibby, re-elected ; Middlesex, Ralph Willis, re-elected.

GEORGE C. LUDLOW,
President.

REPORT OF THE STATE SUPERINTENDENT.

DEPARTMENT OF PUBLIC INSTRUCTION, }
TRENTON, N. J., November 2d, 1882. }

To the Honorable, the Members of the State Board of Education :

GENTLEMEN:—In obedience to the requirements of the School law I have the honor to present to you the following report of the working of the Public School System of the State of New Jersey, for the year ending August 31st, 1882.

The following is a summary of the amount of money received from the various sources named and appropriated to the support of the public schools :

Amount of State school tax available September 1st, 1882.....	\$1,342,656 00
Amount of State appropriation, re-apportionment from last year.....	48 26
Additional State appropriation.....	100,000 00
Township school tax.....	24,213 00
Interest of surplus revenue.....	33,202 08
District and city tax for teachers' salaries.....	275,932 45
	<hr/>
	\$1,776,051 79
District and city tax for building and repairing school houses.....	366,332 95
	<hr/>
Total amount appropriated for all school purposes..	\$2,142,384 74
Total valuation of school property in the State.....	6,270,778 00
Total census of children between five and eighteen years of age.....	343,897

In the following table a general summary of statistics for this year is given, and compared with similar statistics last year :

SCHOOL REPORT.

SUMMARY OF STATISTICS.

	1881.	1882.	Increase or Decrease.
REVENUE.			
State school tax appropriated by the State.....	\$1,322,740 00	\$1,342,656 00	\$19,916 00 Increase
Additional State appropriation.....	100,000 00	100,000 00	
Township school tax.....	24,329 00	24,213 00	116 00 decrease
Interest of surplus revenue.....	29,980 43	33,202 08	3,221 65 Increase
District and city tax for teachers' salaries.....	275,770 41	275,932 45	162 04 Increase
District and city tax for building school-houses.....	411,099 08	366,332 95	44,766 13 decrease
Total amount for maintaining the schools.....	1,753,119 81	1,776,051 79	22,931 98 Increase
Total amount, including that raised for building.....	2,163,918 92	2,142,384 74	21,534 18 decrease
Value of school property.....	6,275,067 00	6,270,778 00	4,289 00 decrease
DISTRICT SCHOOL TAX.			
Number of districts that raise tax to pay teachers' salaries.....	281	242	39 decrease
Number of districts that raise tax to build school-houses.....	381	485	4 Increase
Number of districts that raise no tax.....	593	500	7 Increase
COST OF EDUCATION.			
Average cost per pupil calculated on total school census.....	\$ 5 22	\$ 5 17	.05 decrease
Average cost per pupil, calculated on average attendance.....	15 92	15 64	.28 decrease
NUMBER OF TEACHERS.			
Males.....	926	911	15 decrease
Females.....	2,560	2,594	34 Increase
SALARY.			
Average salary per month paid to male teachers.....	\$51 07	\$56 96	\$5 89 increase
Average salary per month paid to female teachers.....	32 63	33 41	73 Increase
TEACHERS' CERTIFICATES.			
First Grade, { Number granted to males.....	105	93	12 decrease
{ Number granted to females.....	67	67	
Second Grade, { Number granted to males.....	117	116	1 decrease
{ Number granted to females.....	179	174	5 decrease
Third Grade, { Number granted to males.....	477	445	32 decrease
{ Number granted to females.....	1,042	1,042	
Total number granted to males.....	699	664	45 decrease
Total number granted to females.....	1,288	1,283	5 decrease
Total number granted.....	1,987	1,937	50 decrease
Total number of applicants rejected.....	859	943	84 Increase
Total number of certificates revoked.....	2	1	1 decrease
SCHOOL DISTRICTS, HOUSES, ETC.			
Number of townships and cities.....	274	276	2 Increase
Number of school districts.....	1,370	1,366	4 decrease
Number of school buildings.....	1,585	1,577	8 decrease
Number of buildings owned.....	1,521	1,513	11 decrease
Number of buildings rented.....	64	64	3 Increase
Number of school departments.....	3,556	3,511	45 decrease
Number of unsectarian private schools.....	197	165	32 decrease
Number of sectarian private schools.....	100	96	4 decrease
Number of school visits by county superintendents.....	4,082	4,256	174 Increase
CONDITION OF SCHOOL PROPERTY.			
Number of buildings denominated very poor.....	76	69	7 decrease
Number poor.....	116	115	1 decrease

PERCENTAGE OF ATTENDANCE.

Percentage attending ten months.....	.08	.07	.01 decrease
Percentage attending between eight and ten months.....	.21	.21
Percentage attending between six and eight months.....	.18	.18
Percentage attending between four and six months.....	.17	.17
Percentage attending less than four months.....	.36	.37	.01 increase
Percentage of average attendance.....	.54	.54
Percentage attending the public schools.....	.61	.61
Percentage attending the private schools.....	.13	.13
Percentage attending no school.....	.26	.26
Percentage of census the schools will accommodate.....	.6	.55	.01 decrease

SCHOOL TERMS.

Number of districts that maintained school less than six months.....	16	2	14 decrease
Number that maintained school six months but less than nine months.....	80	65	15 decrease
Number that maintained school nine months or more.....	1,274	1,299	25 increase
Average time the schools have been kept open.....	9 mos., 10 days	9 mos., 12 days	2 days increase

DISTRICT SCHOOL CENSUS.

Number of districts with less than forty-five children..	120	142	22 increase
Number having between forty-five and eighty children	610	596	14 decrease
Number having between eighty and one hundred and twenty children.....	306	298	8 decrease
Number having between one hundred and twenty and two hundred children.....	165	157	8 decrease
Number having between two hundred and five hundred children.....	104	108	4 increase
Number having more than five hundred children.....	65	65
Average number in the districts, excluding the cities..	153	126	27 decrease
Average number in the districts, including the cities..	245	251	6 increase

REVENUE.

The total amount appropriated to the support of public schools this year, exclusive of that raised for building and repairing purposes, is \$1,776,051.79, against \$1,753,119.84 last year, being an increase of \$22,931.95. There is an increase of \$19,916.00 in the amount received from the State school tax; a decrease of \$116.00 in the township school tax; an increase of \$3,221.65 in the amount derived from the surplus revenue, and an increase of \$162.04 in the amount of district and city tax voted to pay teachers salaries and fuel bills. The amount appropriated for building and repairing

schoolhouses this year is \$366,332.95, against \$411,099.08 used for the same purposes last year, being a decrease of \$44,766.13. The total amount appropriated for all school purposes this year is \$2,142,384.74, being a decrease of \$21,534.18 from the total amount of last year.

LOCAL TAXATION.

In two hundred and forty-two districts the schools have been supported in part by special district tax, being a decrease of thirty-nine from last year. The number of districts that raised money last year for building and repairing school-houses was three hundred and eighty-five, an increase of four. Nine hundred districts raised no district tax, an increase of seven.

TEACHERS AND SALARIES.

The number of male teachers employed during the year was nine hundred and eleven, a decrease of fifteen. The number of female teachers was two thousand five hundred and ninety-four, an increase of thirty-four. The average monthly salary paid to male teachers was \$56.96, an increase of \$5.89 on the average salary paid last year; to female teachers an average monthly salary of \$33.41, an increase of \$0.73. The salaries in Essex county average higher both for male and female teachers than in any other county in the State. Hudson ranks next for male teachers, and Union for female teachers. The lowest average for male teachers is in Salem county, and for female teachers in Warren county.

TEACHERS' CERTIFICATES.

Of first grade county certificates ninety-three were issued to males and sixty-seven to females; of the second grade one hundred and sixteen to males and one hundred and seventy-four to females; of the third grade four hundred and forty-five to males and one thousand and forty-two to females. There is a decrease of twelve first grade certificates granted, all males. There is a decrease of six second grade certificates, one to males and five to females. There is a decrease of thirty-two third grade, being all from males. The total number of county certificates granted during the year was one thousand nine hundred and thirty-seven, being a decrease of fifty. The number of applicants who failed to pass the required examination was nine hundred and forty-three, an increase of eighty-four. The percentage of rejection in the several counties ranges from nine one-hundredths to sixty-one one-hundredths; the lowest being in Bergen county and the highest in Mercer. In

Camden the rejections were fifty-seven one-hundredths; in Essex, fifty-six one-hundredths, and in Atlantic fifty-two one-hundredths. One certificate was revoked in Cumberland county.

The following table gives the number of teachers in the counties, respectively, holding each grade, both State, county and city :

COUNTIES	STATE CERTIFICATES.			COUNTY CERTIFICATES.			CITY CERTIFICATES			Special Certificates.	Without Certificates.
	First Grade.	Second Grade.	Third Grade.	First Grade.	Second Grade.	Third Grade.	First Grade.	Second Grade.	Third Grade.

Total.....	114	119	49	411	423	1,147	647	338	248	2	30

The total number of State certificates held is two hundred and seventy-three, of which, as appears by the above table, one hundred and fourteen are of the first grade, one hundred and nineteen of the second, and forty of the third. This is an increase of ten first grade; twenty-seven second grade, and five third grade—a total increase of forty-two State certificates. The total number of county certificates is one thousand nine hundred and eighty-one, of which four hundred and eleven are of the first grade, four hundred and twenty-three of the second grade, and one thousand one hundred and forty-seven of the third grade; being an increase of thirty-three first grade, seventy-five second grade, and eighteen third grade,—a total increase of one hundred and twenty-six. The total number of city certificates is one thousand two hundred and twenty-eight—a decrease of one hundred and ninety first grade, an increase of one hundred and sixty-two second grade, and an increase of one hundred and eight third grade—a net increase in the number of city certificates of eighty. Thirty teachers have no certificates, a decrease of twenty-three. By a resolution of the State Board of Education teachers in certain branches are granted

special certificates. Two of these have been granted, one each in Essex and Hudson counties. Three per cent. of the total number held are first grade State, three per cent. are second grade State, and one per cent. are third grade State; eleven per cent. are first grade county, thirteen per cent. are second grade county, and thirty-three per cent. are third grade county; nineteen per cent. are first grade city, ten per cent. are second grade city, and seven per cent. are third grade city.

SCHOOL TERMS.

The average time the schools have been kept open is nine months and two days, an increase of two days over last year. One thousand two hundred and ninety-nine districts have kept their schools open the time required by law, an increase of twenty-five. Sixty-five were open less than nine months but more than six, a decrease of fifteen. Two were open less than six months, a decrease of fourteen.

DISTRICT SCHOOL CENSUS.

The total number of districts having less than forty-five children each, is one hundred and forty-two, an increase of twenty-two over last year: the number having between forty-five and eighty children is five hundred and ninety-six, a decrease of fourteen; the number having between eighty and one hundred and twenty children is two hundred and ninety-eight, a decrease of eight; the number having between one hundred and twenty and two hundred children is one hundred and fifty-seven, a decrease of eight; the number having between two hundred and five hundred children, is one hundred and eight, an increase of four; the number having over five hundred children is sixty-five, the same as last year. The average number in the districts throughout the State is two hundred and fifty-one, an increase of six: the average number in the districts, excluding the cities, is one hundred and twenty-six, a decrease of twenty-seven.

ATTENDANCE.

The total school census this year is three hundred and forty-three thousand eight hundred and ninety-seven, and increase of eight thousand two hundred and sixty-six over last year. The attendance during this year has been as follows:

Total enrollment in the public school.....	209,326
Number that attended ten months.....	15,159
“ “ “ between eight and ten months....	42,786

Number that attended between six and eight months.....	38,258
“ “ “ “ four and six months.....	36,007
“ “ “ less than four months.....	77,316
Average attendance upon the public schools....	113,532
Number that attended private schools....	44,560
“ “ “ no school.....	89,254

There is an increase of five thousand nine hundred and eighty-four in the total enrollment over that of last year, a decrease of four hundred and one in the number attending ten months; a decrease of two hundred and fifty-five in the number attending between eight and ten months; an increase of one thousand seven hundred and sixty-seven in the number attending between six and eight months; an increase of six hundred and sixty-nine in the number attending between four and six months; an increase of four thousand two hundred and four in the number attending less than four months; an increase of three thousand four hundred and eighty in average attendance; an increase of nine hundred and four in the number attending private schools, and an increase of two thousand one hundred and forty-two in the number attending no school.

The percentage of attendance is given in the following table :

Percentage of total census attending the public schools.....	.61
“ “ “ “ private schools.....	.13
“ “ “ “ no school....	.26
“ “ enrollment attending ten months.....	.07
“ “ “ “ between eight and ten months.....	.21
Percentage of total enrollment attending between six and eight months.....	.18
Percentage of enrollment attending between four and six months.....	.17
Percentage of total enrollment attending less than four months.....	.37
Percentage of average attendance.....	.54
Percentage of census the schools will accommodate.....	.55
“ “ “ “ in the cities will accommodate	.37

The percentage of total enrollment in the public schools remains the same as last year; the attendance for ten months decreased one per cent; the attendance between eight and ten months remained the same as last year; the attendance between six and eight months remained the same as last year; the attendance between four and six months remained the same as last year; the attendance for less than four months increased one per cent. The attendance upon the

public and private schools is seventy-four per cent., the same as last year.

SCHOOL EXPENSES.

In table XV will be found a condensed financial report for each of the cities in the State, giving under Current Expenses:

1. The amount expended for teachers' salaries.
2. The amount expended for superintendents' salaries.
3. The amount expended for janitors' salaries.
4. The amount expended for clerks' and treasurers' fees.
5. The amount expended for fuel and light.
6. The amount expended for incidentals.
7. Total current expenses.

Under Permanent Expenses are given:

1. Amount expended for buildings.
2. Amount expended for repairs.
3. Amount expended for furniture.
4. Amount expended for apparatus.
5. Amount expended for books and stationery.
6. Amount expended for printing and advertising.
7. Amount expended for taking school census.
8. Total permanent expenses.

The aggregate current expenses in all the cities amounts to \$801,256.46, an increase of \$20,260.02 over last year, and the aggregate permanent expenses to \$184,293.52, an increase of \$26,455.07 over last year, making a total expense for all school purposes in the cities of \$985,549.98, an increase of \$46,715.09.

In the following table is given the per capita current expenses in the several counties, based (1) on total census, (2) on enrollment, and (3) on average attendance.

COUNTIES.

The per capita expenses on total school census is highest in Sussex county, being \$6.55, and lowest in Hudson, being \$4.08. The average current expense throughout the State, based on the census, is \$5.17, an increase of \$0.58 over last year. The per capita expense, based on enrollment, ranges from \$6.33 in Ocean county to \$11.87 in Union county, the average in the State being \$8.47, an increase of \$0.90. On average attendance the expense ranges from \$12.11 in Cumberland county to \$20.01 in Union county; the average for the State is \$15.64 an increase of \$1.63 over last year.

In the cities the average current expense, based on the census, exceeds \$4.00 except in Jersey City, New Brunswick and Perth Amboy. The lowest is in Jersey City, being \$3.84, and the highest in Plainfield, being \$7.39; the average for all the cities is \$4.60, a decrease of \$0.07 from last year. Based on the enrollment the expense ranges from \$6.52 in Paterson to \$14.87 in Orange, the average being \$8.87, a decrease of \$0.17. The expense on average attendance ranges from \$11.93 in Paterson to \$21.56 in Orange; the average is \$14.88, an increase of \$0.01.

SCHOOL PROPERTY.

Of the school buildings in the State 1,073 contain but a single room, a decrease of 6. The number having two rooms is 243, a decrease of 10, and the number having more than two rooms is 261, an increase of 8. In the following table this division of school buildings is shown for each of the counties:

COUNTIES.	One Room.	Two Rooms.	More than Two Rooms.

The number of school districts in the State is one thousand three hundred and sixty-six, a decrease of four from last year; the number of school buildings is one thousand five hundred and seventy-seven, a decrease of eight; the number of school departments three thousand five hundred and eleven, a decrease of forty-five. The number of unsectarian private schools is one hundred and sixty-five, a decrease of thirty-two; the number of sectarian private schools is ninety-six, a decrease of four from last year.

During the year thirty-four new buildings have been erected, an increase of eighteen, and sixty-eight school buildings have been repaired or refurnished, an increase of one. The sum expended for these purposes amounts to \$411,099.08, and the amount ordered to be raised next year for the same purposes is \$366,332.95, a decrease of \$44,766.13. The total valuation of school property is \$6,270,778.00, a decrease of \$4,289.00 from last year.

The number of school-houses denominated very poor is sixty-nine, a decrease of seven from last year. One hundred and fifteen are classed as poor, a decrease of one; two hundred and ninety-eight as medium, a decrease of two; five hundred and twenty-four as good, an increase of fifteen; and five hundred and seventy-one as very good, a decrease of thirteen. Those in the cities are classed as follows: Four very poor, an increase of two; nine poor, a decrease of four; twenty-three medium, a decrease of two; fifty-five good, an increase of eighteen; sixty-six very good, a decrease of sixteen.

The school-houses denominated very poor are distributed as follows:

Six in Atlantic county.

One in Bergen county.

Twenty-one in Burlington county.

One in Camden county.

Three in Cape May county.

Three in Cumberland county.

Three in Essex county.

Two in Gloucester county.

Three in Hudson county.

One in Hunterdon county.

Two in Monmouth county.

Two in Ocean county.

One in Passaic county.

Two in Salem county.

Five in Somerset county.

Nine in Sussex county.

One in Union county.

Three in Warren county.

There are no school-houses denominated very poor in the counties of Mercer, Middlesex and Morris. The four school-houses in the cities denominated very poor are situated as follows: One in Jersey City, one in Millville and two in Newark.

As to valuation the school-houses are classed as follows:

Those valued at \$100 or less, 28; a decrease of 7.

Those valued at between \$100 and \$500, 32¹/₄; a decrease of 27.

Those valued at between \$500 and \$1,000, 426; an increase of 7.

Those valued at between \$1,000 and \$5,000, 525; an increase of 12.

Those valued at between \$5,000 and \$10,000, 73; an increase of 2.

Those valued at between \$10,000 and \$20,000, 61; an increase of 11.

Those valued at between \$20,000 and \$40,000, 43; a decrease of 7.

Those valued at over \$40,000, 33; a decrease of 2.

Those valued at one hundred dollars or less are located as follows:

Four in Atlantic county.

One in Bergen county.

One in Burlington county.

One in Gloucester county.

One in Hunterdon county.

One in Morris county.

Two in Ocean county.

One in Passaic county.

Two in Salem county.

Two in Somerset county.

Ten in Sussex county.

Two in Warren county.

Those valued at over \$40,000 each are located as follows:

Fourteen in Essex county.

Thirteen in Hudson county.

Two in Middlesex county.

One in Monmouth county.

One in Morris county.

One in Passaic county.

One in Warren county.

In the cities the buildings are valued as follows :

Those valued at \$1,000 or less, 6 ; an increase of 1.

Those valued at between \$1,000 and \$5,000, 19 ; a decrease of 6.

Those valued at between \$5,000 and \$10,000, 27 ; an increase of 3.

Those valued at between \$10,000 and \$20,000, 26 ; an increase of 10.

Those valued at between \$20,000 and \$40,000, 32 ; a decrease of 6.

Those valued at over \$40,000, 26 ; a decrease of 4.

The school houses in the cities valued at \$1,000 or less are located as follows :

One in Bridgeton.

One in Gloucester City.

One in Millville.

One in Morristown.

One in Newark.

One in Perth Amboy.

These valued at over \$40,000 are located as follows :

One in Hoboken.

Eight in Jersey City.

One in Morristown.

Thirteen in Newark.

One in New Brunswick.

One in Paterson.

One in Phillipsburg.

The average valuation of all the school-houses in the State is \$4,144, a decrease of \$635 from last year. The average value of those in the cities is \$23,077, an increase of \$3,810. The average value in Hudson county is \$26,748, being the highest in the State. The next highest is Essex county, being \$23,013. The lowest average valuations are in Ocean, Somerset, Burlington, Sussex and Hunterdon, and are as follows :

Ocean.....	\$1,008
Somerset.....	1,166
Burlington.....	1,249
Sussex.....	1,264
Hunterdon.....	1,322

The highest average valuation of school-houses in the cities is in Newark ; the next is Jersey City, and the next Hoboken. The

city having the lowest average valuation is Millville; the next is Salem, and the next Bridgeton. The average valuation in these six cities is as follows:

Newark	\$35,769
Jersey City	34,935
Hoboken	33,133
Millville	3,300
Salem	7,516
Bridgeton	7,600

Sixty-four of the school-houses in the State are rented, an increase of three. Twenty-one of these are in the cities, an increase of one. The number owned is one thousand five hundred and thirteen, a decrease of eleven. About seventy per cent. of the school-houses in the State are of wood. In the cities about seventy-five per cent. are of brick. The number constructed of the different materials—wood, brick and stone—are as follows, in the entire State:

Wood	1,211
Brick	285
Stone	81

In the cities:

Wood	36
Brick	118
Stone	3

The number of class-rooms in the buildings of the State is 3,511. Of this number 1,301 are in the cities.

Two hundred and sixty-eight of our school-houses, being seventeen per cent. of the total number in the State, are provided with some means of ventilation other than doors and windows; this is an increase of fifty-eight. Essex has forty-nine buildings with some system of ventilation, against twenty-eight without; Union twenty-four with and nine without; Bergen thirty-two with and thirty-nine without; Camden thirty with and thirty-five without. Not a single school-house in either Cape May or Salem is provided with any means of ventilation except by the doors and windows.

In the cities ninety buildings have some system of ventilation, and sixty-seven are reported as having no means of ventilation except doors and windows. All the school-houses in Bridgeton, Camden, Gloucester City, Orange, Passaic, Perth Amboy, Phillipsburg, Plainfield and Rahway are provided to some extent, while all the buildings in Jersey City and Salem are destitute in this respect.

SUPPLIES.

The number of school buildings in the State supplied with modern desks is one thousand one hundred and twenty-one. The number in which the old style is still retained is four hundred and fifty-six. Fifteen of these are in the cities, viz., two in Hoboken, nine in Millville, two in Newark, and two in Paterson.

The number of buildings provided with maps and charts is nine hundred and twenty-six. The number without maps and charts is six hundred and fifty-one, a decrease of twelve. Nine of these are in the cities, distributed as follows: Millville, four; Orange, one; Paterson, one, and Salem three. Hudson is the only county in which all the schools are supplied. The number without globes is seven hundred and fifty-seven, or nearly one-half of the entire number of buildings in the State. Of this number thirty are in the cities. Three hundred and fourteen are without dictionaries, a decrease of twenty-seven. Nine of these are in the cities. Gazetteers are provided in nine hundred and twenty-three schools, an increase of fifteen. Six hundred and fifty-four schools are without gazetteers, forty-five of these being in the cities. The number of school buildings in the State without sufficient black-board surface is three hundred and fifty-nine, a decrease of twenty-three.

DISTRICT SCHOOL LIBRARIES.

The following schools have established or added to their free school libraries during the year:

Atlantic county, first application, Nos. 32 and 39; second application, No. 1 (New Jersey avenue and Indiana avenue schools); third application, No. 18; fourth application, No. 16; fifth application, Nos. 1 (Pennsylvania avenue school) and 22; sixth application, No. 15; ninth application, No. 50.

Bergen county, first application, Nos. 36 (school No. 2) and 57; third application, Nos. 36 (school No. 1), 40½ and 41; fourth application, Nos. 15 and 45; fifth application, No. 40; ninth application, Nos. 6 and 37.

Burlington county, first application, Nos. 30, 53, 73 (school No. 1), 79 and 82; second application, Nos. 43, 52 and 58 (school No. 1); fourth application, No. 12.

Camden county, first application, Nos. 1 (school No. 2) and 18; second application, No. 40; fifth application, Nos. 21 and 30.

Cape May county, second application, No. 26.

Cumberland county, first application, Nos. 15 and 18; second application, No. 31.

Essex county, first application, Nos. 23, 28 (school No. 2), 42 and 43 (Miller street and Wickliffe street schools); second application, Nos. 8 (school No. 2), 19, 33 and 43 (Thomas street, Houston street, Walnut street, Oliver street, Eighteenth avenue, Central avenue, Morton street, Lawrence street and Commerce street schools); third application, Nos. 41 and 43 (High and Chestnut streets schools); fourth application, Nos. 13 and 28 (school No. 1); fifth application, No. 27; seventh application, No. 8 (school No. 1); eighth application, Nos. 4 and 11; tenth application, No. 20.

Gloucester county, first application, No. 15; second application, No. 1 (school No. 3); third application, Nos. 1 (school No. 2) and 7; fourth application, No. 16; sixth application, No. 1 (school No. 1).

Hudson county, first application, Nos. 13 (school No. 21), and 15 (schools Nos. 1 and 3); second application, Nos. 13 (schools Nos. 8, 12 and 13) and 15 (school No. 2); third application, No. 12 (school No. 4); sixth application, Nos. 12 (schools Nos. 1, 2 and 3) and 13 (schools Nos. 7 and 10).

Hunterdon county, first application, Nos. 30, 62, 76, 83, 88, 93 and 104; second application, Nos. 4 and 26; third application, No. 61; fourth application, Nos. 13 and 67; sixth application, No. 87.

Middlesex county, first application, Nos. 12, 22, 63 and 65; second application, Nos. 2, 17 and 64; third application, No. 39; fifth application, No. 73 (French street, Hale street, Guldin street, Carman street and Livingston avenue schools); sixth application, No. 73 (Bayard street school).

Monmouth county, first application, Nos. 7 (school No. 2), 42, 48, 67, 85 (schools Nos. 2 and 3), and 92 (school No. 1); second application, Nos. 1, 85 (High School), and 102; third application, Nos. 3 and 73 (school No. 1); fourth application, No. 75 (school No. 1); sixth application, No. 59.

Morris county, first application, Nos. 44, 47, 48, 59, 87 and 89; second application, Nos. 20, 63, 66 and 67 (school No. 2); third application, No. 67 (school No. 1); fourth application, No. 86; sixth application, Nos. 69 and 79; eleventh application, No. 82.

Passaic county, first application, No. 35 (schools Nos. 6 and 10); second application, No. 35 (school No. 2); third application, Nos. 14 and 15.

Salem county, first application, No. 56.

Somerset county, first application, No. 8; third application, No. 66; seventh application, No. 29.

Sussex county, first application, Nos. 19, 20, 43, 51, 61 and 118; third application, No. 116; fourth application, Nos. 103 and 106.

Union county, first application, Nos. 5 (school No. 1) and 11; second application, No. 5 (school No. 2); fourth application, No. 14; fifth application, Nos. 1 and 20; sixth application, Nos. 18 and 19.

Warren county, first application, Nos. 31, 52 and 53.

The number of 1st applications made during the year is sixty-one, an increase over last year of four; of 2d applications, thirty-nine, an increase of seven; of 3d applications, nineteen, an increase of one; of 4th applications, fourteen, a decrease of five; of 5th applications, thirteen, a decrease of four; of 6th applications, fourteen, an increase of eight; of 7th applications, two, a decrease of one; of 8th applications, two, a decrease of one; of 9th applications, three, an increase of two; of 10th applications, one, the same as last year; of 11th applications, one, an increase of one. The total number for the year is one hundred and sixty-nine, an increase over last year of twelve. Five hundred and ninety-five schools have established libraries; one hundred and eighteen have made the second application; sixty-two the third application; forty the fourth application; twenty-five the fifth application; twenty-five the sixth application; eight the seventh application; three the eighth application; three the ninth application; one the tenth application, and one the eleventh application.

The following table shows the total number of payments to each county:

NORMAL TEACHERS.

In the following table is given the number of graduates of the State Normal School that were found teaching in the several counties during the past school year. The table also gives the number of undergraduates teaching in each county. By undergraduates is meant those who have been pupils at the Normal School, but who left before graduation.

COUNTIES.	GRADUATES.	UNDER GRADUATES.
Atlantic.....	10	1
Bergen.....	20	10
Burlington.....	20	13
Camden.....	9	7
Cape May.....	1	1
Cumberland.....	18	6
Essex.....	29	11
Gloucester.....	10	6
Hudson.....	6	..
Hun erdon	13	3
Mercer.....	45	12
Middlesex	13	8
Monmouth.....	16	6
Morris.....	7	13
Ocean.....	1	2
Passaic.....	7	2
Salem.....	6	3
Somerset.....	6	4
Sussex.....	4	14
Union.....	5	5
Warren.....	7	4
Total.....	259	136

From the above table it appears that two hundred and fifty-nine Normal graduates are teaching in the schools of the State, an increase of twenty-one over last year; and that one hundred and thirty-six undergraduates are teaching, a decrease of two.

The total number of teachers furnished by our Normal School is three hundred and ninety-five, which constitutes about eleven per cent. of the entire number in the State.

EVENING SCHOOLS.

During the past year evening schools have been held in the cities of Elizabeth, Gloucester City, Hoboken, Millville, Morristown, Newark, Paterson and Salem.

In the following table is given the number of evenings these schools have been kept open; the number of pupils enrolled; the average attendance; number of teachers employed; salary paid and total expense:

CITIES.	Number of evenings the schools have been kept open.	Number enrolled.	Average evening attendance.	Number of teachers.	Average salary per week to teachers.	Total appropriation for evening schools.
Elizabeth.....	40	517	127	8	\$7.44	\$125.60
Gloucester City.....	90	140	50	2	11.64	559.27
Hoboken.....	70	384	139	6	7.50	600.00
Millville.....	23	576	223	13	3.96	800.00
Morristown.....	40	44	26	1	0.00	96.00
Newark.....	57	1,712	858	36	8.00	4,324.57
Paterson.....	13	2,225	949	43	5.89	2,326.72
Salem.....	110	83	49	2	5.00	212.75
Total.....	473	5,631	2,456	116	\$7.43	\$8,954.31

The number of evenings the schools have been kept open is five less than last year; the total number of pupils enrolled was five thousand six hundred and eighty-one, an increase of eight hundred and five; the average evening attendance, two thousand four hundred and fifty-six, an increase of four hundred and fifty; the number of teachers employed, one hundred and sixteen, an increase of twelve; the average salary per week, seven dollars and forty-three cents, an increase of thirty-one cents; the total amount appropriated for evening schools, eight thousand nine hundred and fifty-four dollars and thirty-one cents, a decrease of eleven dollars and thirty-six cents. The percentage of average attendance on the total number enrolled was forty-three, an increase of three per cent. over last year. The percentage of attendance ranged from twenty-four to fifty-nine, the highest being in Morristown and Salem, and the lowest in Elizabeth.

SCHOOLS.

The following table shows by counties the number of teachers who make use of the text-book in hearing recitations, the number who do not, the number of schools in which the children are required to study lessons at home, and the number in which they are not; also, the average number of studies pursued in the schools and the average number of recitations heard daily:

COUNTIES.	Number of teachers too closely confined to the text-book in hearing recitations.	Number of teachers not thus too closely confined to the text-book	Number of schools in which the children are required to study at home.	Number of schools in which the children are not required to study at home.	Average number of studies pursued in the schools.	Average number of recitations heard daily.

Rahway.....		21	21		9	9
Salem.....		22	20	2	11	10
Trenton.....		68	67	1	11	9
Total.....	203	1,175	845	533	10	9

It appears from the above table that about one-fifth of the teachers in the State are too closely confined to the text-book during recitations. These tables do not refer to such studies as require the use of the use of the text-book by the teacher when in the class-room. The last report did not contain these items. The report for the previous year showed that about one-fourth of the teachers in the State were not sufficiently familiar with the lessons to be able to conduct recitations without the text-book.

It will be observed that the average number of classes, and the average number of daily recitations is considerably higher in the counties than in the cities. This is due, of course, to the fact that it is impossible to grade the schools in the rural districts.

ATTENDANCE.

The following tables give the average enrollment; average daily attendance; average number of cases of tardiness per day, and the per centage of daily attendance in the counties and cities :

COUNTIES.

	Average enrollment in each room.	Average daily attendance.	Average number of cases of tardiness per day for each room.	Percentage of daily attendance upon average attendance.

Total.....	48	39	1.71	.79

This is the first time this table has been given for the counties. The daily attendance upon enrollment is highest in Essex county, being eighty-two per cent.; Hudson is the next highest, at eighty-one per cent. Union stands first as regards promptness, the average number of cases of tardiness per day, for each room, being only .82. Essex is next, with .86 per day. Of the cities, New Brunswick still maintains her position, the percentage of daily attendance being .97. The other cities that report a percentage of ninety per cent. or over are Elizabeth, .93; Jersey City, .91; Morristown, .90, and Orange, .90. The percentage for all the cities is, .79, an increase of one per cent. The average number of cases of tardiness per day, for each room, in New Brunswick is .08, a decrease of .05. The cities that rank next in the matter of promptness are Newark with an average number of cases of tardiness per day of .15, Morristown with .28, Salem with .29, Plainfield with .30, and Elizabeth with .31.

The lowest percentage of attendance among the cities is in Gloucester City, where it is only .58. The greatest number of cases of tardiness per day is eleven in Millville. The average number per day for all cities is 1.71, a decrease of .52.

Many of our school-rooms are over-crowded. No teacher can do himself or his pupils justice when in charge of more than sixty children. The evil is great enough in a primary department where the pupils are all about the same age and all pursue the same studies; but it is far greater in a rural district where the scholars range from five to eighteen years of age necessitating a large number of classes. Many of our ungraded schools have an average term enrollment of eighty, and some as high as one hundred.

Below is given, by counties, the schools having an average term enrollment of eighty or more pupils in charge of one teacher. Unless otherwise specified they are all in ungraded country schools.

Atlantic County—District No. 26, enrolled, 84.

Bergen County—District No. 35 (Primary Department), enrolled, 108.

Burlington County—District No. 1 (Primary Department), enrolled, 96; District No. 15 (Primary Department), enrolled, 87; District No. 69, enrolled, 84; District No. 73 (Primary Department), enrolled, 87.

Camden County—District No. 43, enrolled, 82.

Cape May—District No. 13, enrolled, 90.

Cumberland County—District No. 10 (Primary Department), enrolled, 91; District No. 14, enrolled, 87.

Essex County—District No. 4 (Primary Department), enrolled, 85; District No. 31 (Primary Department), enrolled, 80; District

No. 37 (Primary Department), enrolled 85 ; District No. 39 (Primary Department), enrolled, 86.

Gloucester County—District No. 41 (Primary Department), enrolled, 91 ; District No. 42, enrolled, 92 ; District No. 43 (Primary Department), enrolled, 87 ; District No. 46, enrolled, 110.

Hudson County—District No. 3 (Primary Department,) enrolled, 84 ; District No. 6 employes ten teachers. Five of these have under their charge respectively 107, 102, 92, 87 and 82 ; District No. 11, three of the lower rooms have enrolled 98, 86 and 86 ; District No. 15 (School No. 5 in Primary Department), an enrollment of 93.

Hunterdon County—District No. 87 (Primary Department), enrolled, 113.

Mercer County—District No. 28, enrolled, 85.

Middlesex County—District No. 5, enrolled, 87 ; District No. 45, enrolled, 81.

Monmouth County—District No. 25, enrolled, 89 ; District No. 26, enrolled, 84 ; District No. 34, enrolled, 95 ; District No. 42, enrolled, 84 ; District No. 51, enrolled, 89 ; District No. 52, enrolled, 102 ; District No. 60, enrolled, 84 ; District No. 75, three rooms with 112, 106 and 106 respectively ; District No. 85, has eight rooms ranging from 80 to 82 each ; District No. 93, enrolled, 82 ; District No. 94, two rooms with 107 and 100 ; District No. 98, enrolled, 89.

Morris County—District No. 9 (Primary Department), enrolled, 111 ; District No. 54, enrolled, 89 ; District No. 55, enrolled, 95 ; District No. 66, enrolled, 83 ; District No. 95 (Primary Department), enrolled, 115.

Ocean County—District No. 16, enrolled, 82 ; District No. 38, enrolled, 83.

Salem County—District No. 43, enrolled, 111 ; District No. 45, enrolled, 88 ; District No. 64, enrolled, 90.

Somerset County—District No. 29, two primary rooms with 126 and 103 ; District No. 61, enrolled, 102 ; District No. 73, enrolled, 81.

Sussex County—District No. 25, enrolled, 95 ; District No. 37 (Primary Department), enrolled, 84 ; District No. 115 (Primary Department), enrolled, 85.

Warren County—District No. 9, enrolled, 88 ; District No. 10, enrolled, 95 ; District No. 10 1-2, enrolled, 88 ; District No. 32 (Primary Department), enrolled, 85 ; District No. 50, enrolled, 89.

From the above it appears that there are seventy-six teachers in our rural schools having eighty or more pupils each. Passaic and Union counties do not report any teacher as having as large a number.

The primary departments in some of the cities are in the same condition. In Atlantic City there are three rooms having an enrollment of over eighty, the highest being 85. In Camden there are eight rooms ranging from 83 to 106. Elizabeth has three rooms with an enrollment of 81, 84 and 113. Gloucester City reports three rooms with an enrollment of 80, 88 and 100. Four rooms in Hoboken have respectively 83, 87, 100 and 101. In Jersey City there are eighteen, each having an enrollment of 80 or more. In six of them the enrollment is over 100, the highest being 107. Newark reports only three rooms as having over 80 pupils each. The enrollment in these is 86, 87 and 97. The enrollment in one room in Passaic City is 94, and in another 120. In Paterson there are four rooms having an enrollment of over 80, one having 87, one 91, and two 96 each. In Phillipsburg there are seventeen rooms that have above 80, the lowest having 83. Five of these have over 100 each, the number enrolled in them being 139, 153, 153, 160 and 160. Plainfield has one room with 94 and another with 114. Rahway reports one room as having an enrollment of 84. There are no teachers reported as having as high as eighty pupils in the cities of Bridgeton, Millville, Morristown, New Brunswick, Orange, Perth Amboy, Salem and Trenton. In Atlantic City there is no teacher reported as having an average daily attendance of 60; in Bridgeton there are none; in Camden there are 5; in Elizabeth 8; in Gloucester City none; in Hoboken 3; in Jersey City 36; in Millville none; in Morristown none; in Newark 3; in New Brunswick none; in Orange none; in Passaic 1; in Paterson 12; in Perth Amboy none; in Phillipsburg 19; in Plainfield 1; in Rahway 2; in Salem none; and in Trenton none, making a total of 90.

In respect to certain items the schools are divided by the Superintendents into five grades, one being the highest. These items are :

The extent to which blackboards are used.

The extent to which pupils are correct in recitations.

The order maintained.

The cleanliness of the room.

The character of the school, considering all its conditions.

The following table gives the grades of all the schools in the several counties, with respect to the extent to which blackboards are used :

COUNTIES.					
	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth gr. de.
Atlantic.....	22	31	23	3
Bergen.....	60	47	6

Total.....	911	339	103	24	1

From the above tables it appears that rather less than one-half of the teachers of the State use the blackboard to a satisfactory

extent in hearing recitations. Two-thirds of the teachers in the cities are ranked as first grade in this respect.

The grades of the schools in the counties, as regards thoroughness in recitations, are given in the following table:

COUNTIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic.....	15	31	27	6
Bergen.....	65	42	6
Burlington.....	11	149	21

Plainfield.....	3	10	11
Rahway.....	5	11	4	1
Salem.....	7	15
Trenton.....	6	62
Total.....	406	754	209	9	1

It appears from the above that about twenty-five per cent. of our schools are rated as first grade regarding recitations; fifty-five per cent. second grade; nineteen per cent. third grade, and one per cent. fourth grade. Only one school is rated as fifth grade.

The percentages in the cities are: First grade, thirty per cent.; second grade, fifty-five per cent.; third grade, fourteen per cent., and fourth grade, one per cent.

The following tables for the counties and cities give the grades of the teachers respecting the order maintained in their schools:

COUNTIES.					
	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.
Atlantic.....	22	33	15	8	1
Bergen.....	75	26	12

Total.....	788	433	137	20	8

From the above tables it appears that the Superintendents consider a little more than one-half of the teachers in the State entitled to be ranked as first grade with respect to the maintainance of order. The proportion in the schools in the cities is about the same.

In the following tables are given the grades of the schools in the counties and cities respectively as regards cleanliness and general appearance of the schools.

COUNTIES.	First grade.	Second grade.	Third grade.	Fourth grade.	Fifth grade.

Total.....	775	505	85	7	6

It will be observed from the above tables that about thirty-seven

per cent. of the schools of the State are regarded by the Superintendents as of the first grade; thirty-four per cent. of the second; twenty-five per cent. of the third; three per cent. of the fourth, and one per cent. of the fifth. In the cities fifty-six per cent. are ranked as first-grade; thirty-seven per cent. as second grade; six per cent. as third grade, and one per cent. divided about equally between the fourth and fifth grades.

TEACHING EXPERIENCE.

In the following tables, for the counties and cities, are given statistics showing the length of time the teachers have taught in the districts where they are now teaching. They are divided into seven classes, viz.: Teachers who have been in the same school one year or less; between one and five years; between five and ten years; between ten and fifteen years; between fifteen and twenty years; between twenty and twenty-five years; and over twenty-five years. The average time the teachers have been in their present situations and the longest time by any teacher in the counties and cities respectively is also given:

COUNTIES.	Number who have been in the schools one year or less.	Number between one and five years.	Number between five and ten years.	Number between ten and fifteen years.	Number between fifteen and twenty years.	Number between twenty and twenty-five years.	Number over twenty-five years.	Average Time.		Longest time by any one teacher in years.

It will be observed by inspecting the above tables that one thousand and sixty-three teachers in the State, or about thirty-one per cent. of the entire number, have been in their present situations one year or less; that one thousand three hundred and two, or about thirty-eight per cent., have remained in the same schools between one and five years; six hundred and thirty-five, or nineteen per cent., between five and ten years; two hundred and fifty-three, or seven per cent., between ten and fifteen years; ninety-six, or three per cent., between fifteen and twenty years; thirty-five, or one per cent., between twenty and twenty-five years, and twenty-two, or nearly one per cent., over twenty-five years. The average time the teachers in the State have retained their present positions is three years and nine months. The longest time by any one teacher is thirty-two years.

The percentage of teachers in the cities that have held their present situations for the longer periods is still larger. The percentages for the several periods are as follows: One year or less, twelve per cent.; between one and five years, thirty-four per cent.; between five and ten years, thirty-one per cent.; between ten and fifteen years, fifteen per cent.; between fifteen and twenty years, five per cent.; between twenty and twenty-five years, two per cent., and over twenty-five years, rather more than one per cent.

The average time in the cities is six years and six months. The longest time by any teacher, thirty-two years.

The lowest average among the counties is in Ocean, where it is one year and three months. The highest is in Essex, being six years and five months. The lowest average in the cities is three years and two months in Atlantic City; the highest is eight years and nine months in New Brunswick.

The teachers who have taught thirty-two years in the same school are Harriet N. King, in Camden; George M. Lindsley, in Jersey City, and James M. Quinlan, in Newark.

In the following tables are given the total teaching experience of the teachers, the average total experience and the longest time taught by any teacher in the respective counties and cities :

COUNTIES.	Number who have been teaching one year or less.	Number between one and five years.	Number between five and ten years.	Number between ten and fifteen years.	Number between fifteen and twenty years.	Number between twenty and twenty-five years.	Number over twenty-five years.	Average Time.		Longest time by any one teacher in years.

It appears from the above that of the three thousand four hundred and six teachers in the State four hundred and two, or about twelve per cent., have a total teaching experience of one year or less; one thousand two hundred and forty-three, or thirty-seven per cent., an experience of from one to five years; eight hundred and seventy-four, or twenty-six per cent., between five and ten years; five hundred and four, or fifteen per cent., between ten and fifteen years; two hundred and ten, or six per cent., between fifteen and twenty years; ninety-three, or about two per cent., between twenty and twenty-five years, and eighty, or two per cent., over twenty-five years.

In the cities there are one thousand three hundred and seventy-eight teachers. Of this number one hundred and nineteen, or nine per cent., have a teaching experience of one year or less; four hundred and thirty-four, or thirty-five per cent., between one and five years; three hundred and ninety, or twenty-eight per cent., between five and ten years; two hundred and fifty-five, or nineteen per cent., between ten and fifteen years; ninety-eight, or seven per cent., between fifteen and twenty years; forty-five, or three per cent., between twenty and twenty-five years, and thirty-seven, or two per cent., over twenty-five years.

The average experience of all the teachers in the State is seven years and five months; that of the teachers in the cities eight years and two months. It is an interesting fact that while the

average local experience of the teachers in our city schools exceeds that of the teachers in the State at large by two years and seven months, the difference—total experience—is only seven months.

The following are the names of the teachers who have been teaching twenty-five years or more, together with the districts where they are now teaching, and the length of time they have taught; also, the names of those whose local experience is twenty years or over:

ATLANTIC COUNTY.

J. P. Sherman, of Atlantic City, has taught 35 years.
 John M. Sullivan, of District No. 20, has taught 32 years.
 John Schuster, “ 47, “ 25 “

John Schuster has taught 22 years in District No. 47.

BERGEN COUNTY.

C. L. Wagoner, of District No. 29, has taught 37 years.
 Aaron Ryder, “ 11, “ 33 “
 F. G. Bennett, “ 7, “ 30 “
 Jere. Fruttchey, “ 4, “ 28 “
 A. Moench, “ 37, “ 27 “

BURLINGTON COUNTY.

John W. Nutt, of District No. 69, has taught 37 years.
 Ella Powell, “ 16, “ 27 “
 Milton H. Allen, “ 87, “ 25 “

CAMDEN COUNTY.

Anna C. Forehand, of District No. 4, has taught 32 years.
 Harriett N. King, of Camden, “ 32 “
 Priscilla H. Redfield, of Gloucester City, “ 30 “
 Sallie T. Brown, of Camden, “ 29 “
 Anita A. Wright, “ “ 28 “
 M. Jennie Wood, “ “ 27 “

Harriett N. King has taught 32 years in Camden.

M. Jennie Wood “ 27 “ “
 Anita A. Wright “ 27 “ “
 Sallie T. Brown “ 26 “ “
 Anna Wood “ 22 “ “

CAPE MAY COUNTY.

Reuben S. Robinson, of District No. 4, has taught 25 years

CUMBERLAND COUNTY.

Sanford Culver, of Millville, has taught 45 years altogether, and 21 years in his present school.

Miss M. E. Foster has taught 20 years in Bridgeton.

ESSEX COUNTY.

James M. Quinlan, of Newark, has taught 36 years.

Ephraim Dietrich,	" 90,	" 25 "
J. C. Butler, of Phillipsburg,	"	" 25 "

AGES OF SCHOOL CHILDREN.

Under our school law all children between the ages of five and eighteen years are entitled to attend the public schools. Each child, therefore, may attend school for thirteen years. It is important to know to what extent the children avail themselves of this privilege in order that we may determine what studies should be introduced in our schools, and how far the various branches taught should be pursued.

In table XIII is given the number of children between the ages of five and six, between six and seven, &c., enrolled in the schools of the several cities. Table XIV gives the percentage of children of the various ages in the city schools. Forty-seven per cent. of the children enrolled in the city schools are between six and ten years of age, while only ten per cent. are above fourteen years of age. Millville reports the largest percentage of children between five and six, viz.: twelve per cent. Gloucester City is next with eleven per cent. There are only two children of this age enrolled in the schools of Perth Amboy. In Plainfield there are none of this age in the schools.

The maximum percentage in Atlantic City is thirteen per cent., being between the ages of eight and nine; in Bridgeton it is twelve per cent., between the ages of ten and eleven; in Camden it is twelve between seven and eight, remaining the same until the age of eleven; in Elizabeth twelve per cent., between nine and ten years; in Gloucester City sixteen per cent., between six and seven, the same percentage is reached again between nine and ten; in Hoboken fourteen per cent., between seven and eight years; in Jersey City twelve per cent., from seven to ten; in Millville fifteen per cent., from six to eight; in Morristown ten per cent., between nine and ten; in Newark fourteen per cent., from six to eight; in New Brunswick twelve per cent., between seven and eight, the same percentage being again reached between nine and ten; in Orange fifteen per cent., between eight and nine; in Passaic thirteen per cent., between seven and eight, and between nine and ten; in Paterson fourteen per cent., from six to ten; in Perth Amboy thirteen per cent., from nine to eleven; in Phillipsburg sixteen per cent., between eight and nine; in Plainfield twelve per cent., between eleven and twelve; in Rahway fourteen per cent., from nine to eleven; in Salem eleven per cent., between eight and nine, and in Trenton thirteen per cent., from nine to eleven.

The following table shows the percentages of children of the several ages in the schools of the cities:

Percentage of enrolled pupils in the cities between 5 and 6 years of age.										
"	"	"	"	6	"	7	"	"	"	.06

"	"	"	"	11	"	12	"	"	"	.10
"	"	"	"	12	"	13	"	"	"	.09
"	"	"	"	13	"	14	"	"	"	.07
"	"	"	"	14	"	15	"	"	"	.05
"	"	"	"	15	"	16	"	"	"	.03
"	"	"	"	16	"	17	"	"	"	.01
"	"	"	"	17	"	18	"	"	"	.01

Fifty-two per cent. of all the children in the cities are in the public schools, eighteen per cent. are in private schools, and thirty per cent. have attended no school during the year.

From the above statistics it is evident that a large majority of the children who are reported as not having attended any school during the year are either between five and six or over fourteen years of age. These include, of course, all those children who are considered by their parents as too young to attend school, and those who, having received more or less instruction, have been compelled to leave school in order to earn a living.

If, in considering these figures, we bear in mind the fact that the percentages of ages of the children attending private schools are about the same as those given above for the public schools, it becomes manifest that very few children in the State, if any, are growing up without having received some instruction, either in public or private schools.

TEACHERS' INSTITUTES.

During the year Teachers' Institutes were held in the counties of Bergen, Cumberland, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Passaic, Salem, Somerset, Sussex, Union and Warren.

ELLIS A. APGAR,

State Superintendent of Public Instruction.

APPENDIX.

REPORTS OF CITY SUPERINTENDENTS.

CAMDEN.

HENRY L. BONSALE, SUPERINTENDENT.

To E. A. Appar, State Superintendent :

In transmitting the usual facts and figures relating to our local school system, I am gratified to be able to report satisfactory material progress and encouraging educational development. While our course is so graded that those who go through the entire curriculum compare favorably in their attainments with graduates of many High Schools and so-called Colleges ; the main object is to make the instruction as thorough as possible as far as it goes, the management realizing that many of the pupils must go forth to earn their own living and make their way in the world before "finishing their education." We do not claim to be alone peculiar in this respect, but inasmuch as the subject of technical education has been agitated here to an injurious extent by men who affect to believe that the highest function of the teacher is to impart a knowledge of how to shove a jack-plane or drive a ten-penny nail by continually exalting hand-labor at the expense of head-labor, by bringing the foundry, machine shop, factory and saw-mill next door to the school-house, more stress has been laid upon what are thought to be the more practical fundamental branches, while none of the essentials of a more liberal education are neglected. In other words, we try to impart sufficient information to enable the pupils to apply themselves intelligently to whatever trade or profession they may select,

believing that they will gain a more comprehensive knowledge of the avocation after learning how to study than they would ever reach through the superficial jack-of-all-trades manipulation which leaves them master of none.

This is not the place to discuss this subject, however, and if I have made myself plain in a mere hint, the elucidation of which would take pages, I have accomplished the purpose of this report.

ELIZABETH.

J. AUGUSTUS DIX, SUPERINTENDENT.

To Ellis A. Appgar, State Superintendent :

SIR:—In attempting to review the work of the year, the subject that first calls for attention is the lack of sufficient school accommodations, which still continues to hamper us in our efforts to educate the children of this city. We hope that arrangements may be made to secure a new building under the law passed at the last session of the Legislature, but considerable time must elapse before any relief can be obtained by this means. I have, therefore, urged that in the meantime temporary accommodations should be secured in stores or dwelling-houses, but although efforts have been made in this direction, so far nothing has been accomplished owing to the lack of means.

As no more accommodations were furnished, we adopted as a temporary expedient the plan of dividing the lower classes in the primary department, where the over-crowding was greatest, so that one-half of the children attended school in the morning and the other half in the afternoon, the order being reversed each week, so that those who attended in the morning one week, attended in the afternoon the next. We have received a few complaints from parents, but chiefly from those whose occupations are such that

they can, unfortunately, give but little attention to their children, and gladly avail themselves of the school as a great convenience in relieving them of their care during a portion of their working hours. Though this plan may thus cause some inconvenience in individual cases, yet from our standpoint it has been very successful, and I think that the teachers who have tried it, consider it a vast improvement upon the former state of affairs. The children are far brighter and more attentive during the short time they are thus kept in school, and accomplish more and better work. For my part, I believe that many of these little ones should not be in school at all, and that the minimum school age should be not less than six years.

The placing of experienced teachers in charge of the "commencing classes" of the primary departments has been attended with most excellent results. The new teachers coming into the schools are, however, no longer entirely without experience, on account of the enforcement of our rules as to visiting the schools, of which I spoke last year. The Committee on Teachers have been very particular in their appointments, uniformly giving the preference to those candidates who make it their duty to visit the schools regularly, observe the methods of teaching, assist in teaching or make themselves useful in any way that the principal may suggest. Before they can do this, these candidates must have passed an examination and obtained trial-certificates, which also entitle them to teach as substitutes when called upon for that purpose. I require monthly reports from the principals of all visits thus made by candidates, and they are thus kept under constant supervision.

The meetings of the "Normal School" still continue, though at longer and irregular intervals, the sessions being held in the evening. We have had several interesting addresses, noticeably one by Dr. John M. Gregory. The "conference" meetings of the Normal School, when no speaker is employed, and when the teachers are given an opportunity to express their views, have been productive of good, and attention has thus been drawn to matters of importance. I have also called meetings of principals and vice-principals from time to time for the purpose of securing uniformity in reports and examinations and for the interchange of views, and these meetings have likewise been attended with very satisfactory results.

Through the discussion at one of the conference meetings, and through the publication in the newspapers of the statistics on the subject, as presented in my monthly reports, attention was called to the matter of tardiness, and the result has been a continual decrease, until one month the per centage of tardiness on average daily attendance was but two-fifths of one per cent., and in one of our schools, and that the largest, one-tenth of one per cent.

For a time during the prevalence of small-pox throughout the country the attendance in the schools rapidly fell away on account of the rigid enforcement of the rules relative to vaccination. Upon investigation it had been found that there were 236 children who had never been vaccinated, and 1,074 who had not been vaccinated in seven years. All these children were required to be vaccinated, and although much opposition was met with, and many left the schools, the rule was enforced, the excitement finally passed away, and the attendance again reached its normal proportion.

Heretofore there has been a lack of system in the promotion of pupils from the Grammar to the High School departments, and there has also been a lack of uniformity in the examinations for graduation from the High School departments, as the examinations were conducted separately by the principals of the several schools. This year, however, question papers were prepared by the Superintendent, and were printed, and after being sealed up in packages, were distributed to the teachers, by whom they were opened in the presence of the children at the time of the examination in each subject, which time and subject were the same in all the schools. The answers were immediately sealed up and sent to me, and were afterwards examined by a committee of teachers under my supervision. Of 147 pupils examined in the studies of the grammar grade, 130 received Grammar School certificates, and of eleven examined in the studies of the High School grade, all were graduated and received diplomas.

In the last instance the standard was quite high, though in the case of the grammar scholars we did not think it advisable to require as much as we shall expect hereafter. The examination, which was in some degree an experiment, was very satisfactory in its results. A teachers' institute was held in this city May 1st, 2d and 3rd, and was a success from every point of view. The lecturers employed, Profs. Henry Houck and Samuel B. Heiges, are men well qualified for the work, and the lectures were marked by practical common sense, and ought to be of great service to the teachers.

The evening schools were kept open three evenings each week, during two short terms, but, although the attendance at the beginning was good, it rapidly fell away. Many pupils were required by their employers to work too late in the evening to enable them to attend the schools, and this and other causes tended to reduce the size of the schools.

At the request of the Board, I attended the meeting of the Department of Superintendence at Washington, D. C., March 21-24, 1882, and the meeting was of considerable interest, as may be seen from the report of its proceedings since published by the Government as circular of information of the Bureau of Education, No. 2, 1882.

The school census this year has been something of a surprise to us, as instead of the constant increase of former years, there was a considerable decrease.

In 1879 the number of children of school age in this city was reported as 7,180 ; in 1880, 7,710 ; in 1881, 8,625 ; but in 1882 only 7,858, or a decrease of 767.

As the growth of the city during this period has been steady though slow, these figures can hardly be accurate. I do not think the present system of taking the census, by enumerators appointed by the Board, is what it should be, as there is no one person upon whom the responsibility is placed. I should advocate the taking of the census by the Clerk of the Board, as the law allows. He should be fully paid for the work, and held responsible for its faithful performance. I think the result would be far more satisfactory than under the present system.

— — — —

HOBOKEN.

DAVID E. RUE, SUPERINTENDENT.

To E. A. Apgar, State Superintendent :

In addition to the statistical report furnished, I am happy to state that the year just closed has been one of unusual prosperity in the schools. While nothing has occurred to challenge special attention in the ordinary routine of the school-room, steady and earnest devotion to their duties on the part of both teachers and pupils has secured marked progress and gratifying results. Both the aggregate and per cent. of daily attendance have been greater than during any previous year, except for a short period, when the small-pox threatened to become epidemic in our city. At this time many children were excluded who lived in infected or adjoining houses. A new Manual was issued at the commencement of the present year, in which several important changes in the government and

discipline of the schools were introduced ; it also contains new grades of study adapted to the higher stand our schools have taken in the last few years. The schools under the supervision of the Board of Education number twelve (12), consisting of the following :

High School.....	1
Grammar Schools for both sexes in the same building but in separate classes.....	4
Primary Schools in the same building with grammar departments.....	4
Primary annex to School No. 1.....	1
Evening School.....	1
Saturday Normal School.....	1
Total.....	<hr/> 12

The number of schools is the same as given in last report, but certain classes are so large as to require the services of two teachers each to take charge of them. More school room is imperatively needed, not only to meet the certain increase that will follow the opening of the schools after vacation, but to relieve the present overcrowded condition of the schools. The act of the last Legislature entitled "An act to authorize the construction of school-houses in cities of this State," etc., was a wise and judicious measure, and the Board of Education, in accordance with this, has requested the Mayor and Common Council of the city to provide for the building of another schoolhouse, which I hope to see completed before my next report.

HIGH SCHOOL.—This branch of our school department continues to grow in favor with both pupils and parents. At the annual examination in June, fifteen (15) pupils secured a general average of 80 per cent., and were granted diplomas of graduation.

The evening school was opened on November 10th, 1881, and closed on the last day of February, 1882. The total number enrolled was 384, the average attendance 139. The attendance was diminished, and the efficiency of the school considerably impaired by the absence of many pupils who left school on account of the small-pox. Before this, the attendance was much beyond the average, and the attention to study on the part of pupils commendable. Six classes were organized, two for females and four for males. The class of last year for the benefit of Germans unable to speak English was continued this year.

NORMAL SCHOOL.—This school is held every Saturday forenoon of each school week. At the examination held in October of last year, fifteen members of the school graduated. The certificates, exclusive of diplomas, are issued in accordance with the State law,

but must be renewed annually. Instruction is given in the studies required for each grade, supplemented by ideas on teaching, plans of organizing, and methods of discipline that are adapted to daily use in class work. The total register number is 59, and the average attendance 41.

Our teachers meet once a month. The object of these meetings—the improvement of the schools—was kept steadily in view throughout the year. Such topics were taken up and discussed, as were deemed most profitable. This agency has proved a valuable auxiliary to the teachers in the past, and will be carefully fostered in the future.

Drawing was added to the course of study, and a special teacher appointed to take charge of the same at the beginning of the school year. The importance of this branch, especially in a city situated as is our own, its usefulness in the many applications that can be made of it in every business employment, and its relation to other studies of the schools, make it of great value as an educational agency. The benefits are obvious, and the progress already is sufficient evidence of its utility, and of its final success in our schools.

The Board of Education, in April, passed a resolution restoring the salaries of teachers of all grades to the same rates as paid prior to the reduction which took place in 1879, and earnestly requested the Tax Commissioners, in view of the increased cost of living, etc., to make an appropriation for this purpose. This they failed to do “for reasons best known to themselves,” and our teachers, for another year, at least, are deprived of an increase which they were justly entitled to receive.

JERSEY CITY.

WM. L. DICKINSON, SUPERINTENDENT.

To E. A. Apgar, State Superintendent :

I hereby submit my annual report of the public schools of Jersey City for 1882 :

The entire number of schools which I have had under my supervision during this year does not vary from that of last year.

The number of schools is now twenty-one, which are classified and sub-divided as follows :

High School.....	1
Training School—Primary Grade, attached to High School.....	1
Grammar School for Girls.....	1
“ “ “ Boys.....	1
“ “ “ both sexes.....	12
Primary Schools for both sexes in same building with Grammar Department.....	13
Primary Schools for both sexes in separate buildings.	6
Annex of School No. 3.....	1
“ “ “ 11.....	1
Total.....	37

The number of buildings in which these schools are conducted is twenty (20), of which seventeen (17) belong to the city and three (3) are rented premises. Fifteen of the buildings which belong to the city are constructed of brick and two are built of wood. All of the buildings hired for school purposes are wooden structures.

School No. 19, and the annexes of Nos. 3 and 11 were built for the use of the Fire Department, and for a long time were used as engine houses. They are small and afford comfortable quarters for but a few children.

NUMBER AND CLASSIFICATION OF TEACHERS.

Male Principals in Grammar Schools.....	13
“ “ in High and Training Schools.....	1
“ Vice-Principal in High and Training Schools..	1
“ Professor of German in High and Training Schools.....	1
Male Professor of Latin and Greek in High and Train- ing Schools.....	1
Female Principal in High and Training Schools.....	1
Female Professor of French in High and Training School.....	1
Female Assistants in High and Training School.....	4
“ Principal of Grammar Department.....	1
“ “ “ Primary “.....	18
“ Assistants in Grammar “.....	111
“ “ Primary “.....	176
Total.....	329

Number of Teachers in Grammar Departments.....	135
“ “ Primary Departments.....	194
Total.....	329

The age of the several school buildings and the dates of their erection are given in the following table. Those numbered 9, 15, 18 and 19, not belonging to the Board of Education, are omitted :

SCHOOL BUILDING.	DATE OF ERECTION.	AGE.	SCHOOL BUILDING.	DATE OF ERECTION.	AGE.
No. 1.....	1847	34 years.	No. 10.....	1869	13 years.
“ 2.....	1855	26 “	“ 11.....	1858	23 “
“ 3.....	1860	21 “	“ 12.....	1872	9 “
“ 4.....	1868	13 “	“ 13.....	1868	13 “
“ 5.....	1873	8 “	“ 14.....	1869	13 “
“ 6 (Old part).....	1861	20 “	“ 16.....	1860	21 “
“ 6 (New part).....	1873	8 “	“ 20.....	1867	14 “
“ 7.....	1877	4 “	“ 21.....	1880	1 “
“ 8.....	1876	5 “			

Most of these buildings need extensive repairs. They are very old, and the work of repairing has not kept pace with the inevitable losses produced by the hand of time, and the wear and tear of the occupation and use by more than 20,000 children each year. Often it has happened that the repairs of a year have been postponed for want of money until the next year, then to be added to the needs of that year for which there has been a scanty appropriation.

Thus, gradually and rapidly, the buildings and their furniture have become more and more dilapidated. The cost of putting all of them and their appurtenances in good order would thus seem unreasonably large to those who do not know that the present needful repairs are the accumulations of several years.

NUMBER OF APPLICANTS REFUSED ADMISSION TO THE PUBLIC SCHOOLS FOR WANT OF ROOM.

SCHOOLS.	Dec.	Jan.	Feb.	Mar.	April.	May.	June.	Sept.	Oct.	Nov.	Total
School No. 1.....			3								3
" " 2.....		18	8	12	57		3	179	84	43	404
" " 3.....			25					110	32	29	196
" " 4.....	3	8	7	19	24	27	18	80	42		221
Training School 5.....									15		15
School No. 7.....								47	4		51
" " 11.....		2	2	2	2			2	10		20
" " 12.....		4		12	40	27		120	33	23	259
" " 13.....								3			3
" " 19.....			15	17	15	17	4	20	26	17	131
" " 20.....										6	6
Total.....	3	32	60	62	138	64	25	561	246	118	1,309

Notwithstanding the erection of School No. 21, whereby the seating accommodations of the schools were largely increased, there were 321 more refusals to admit pupils than there were last year.

Nearly one-half of the refusals were in Schools Nos. 2 and 4.

ATTENDANCE OF PUPILS.—Although the total number of pupils enrolled during the past year is 520 greater than during the year 1880, the average attendance has not kept pace with the increased enrollment, but has fallen off and is 172 less.

There are three causes which have contributed to this result: First, more frequently than in previous years have the schools been closed for want of heat—sometimes through deficiency of fuel and sometimes on account of the wearing out of furnaces. Secondly, the intense hot weather in September, and cotemporary events affecting the whole nation were also important factors in reducing the attendance. Thirdly, the remarkable prevalence of the small-pox has frightened and scattered the children and depleted the schools more than at any previous time in the history of the city.

Of the whole number in the schools, 52 6-10 per cent. are under ten years of age, 63 4-10 per cent. under eleven years of age, and 74 per cent. are under twelve years of age. This shows that about three-fourths of the children leave the schools as soon as their labors can be made to contribute essentially to the support of the families to which they belong.

COURSE OF INSTRUCTION.—The course of instruction for the grammar and primary departments of the schools is more fully developed in the Manual of Instruction, which for two years has been out of print. The scanty appropriation for printing has prevented, and is likely to prevent during the coming year, any reprint thereof. It is a volume minute in directions for instruction and discipline, such as the most experienced teachers may find useful, and the younger teachers will find almost indispensable.

Several of the subjects mentioned in the course of instruction have a formidable look to those who have not carefully considered the kind and quantity of the knowledge meant. The course of instruction is divided into twelve grades, six in each department. The only subjects taught wherein the pupils use books in all these grades, except the highest, are reading, geography, grammar, arithmetic, spelling and writing. All other subjects are taught orally. Every good teacher feels the need of some relief occasionally for the pupil from the hard, intellectual labor of mastering the studies above named; some oil to lubricate mental machinery. Sometimes this is sought in objectionable methods. To guide, therefore, the inexperienced teacher, and to assist even the skilled instructor in smoothing the paths of intellectual progress, and at the same time impart to the pupil valuable knowledge and open his eyes to the great world of nature, we teach him something about the animals, their classes, peculiarities, uses, etc., and call it zoology. In like manner we teach him something about the plants and stones that every day he sees, to whom they have been simply weeds and stones and nothing more; and then we have given him some knowledge of botany and mineralogy.

These subjects, in the hands of a teacher who knows how to reach the mind of a pupil, are intensely interesting, and their effect upon the moral future of youth in giving them healthy subjects for thought and investigation can hardly be overestimated.

It is sometimes said, with ill-concealed contempt, that in this way children get only a smattering of knowledge on many subjects, and thorough acquaintance with none. This is not well said, because the beginnings of an acquaintance with any subject, of necessity, are superficial. If a child, during all the years of school life, should confine his studies to the "three R's," he would still leave school with very much to be learned before he could be called thorough, even in a few branches. Thoroughness of knowledge is hardly the result of the work even of a life time. Even a smattering of knowledge upon any subject is desirable, and only becomes objectionable when put forward by self-conceit under the mask of profundity and wisdom.

Sometimes the objection is heard that too much attention is given in this course of instruction to other subjects than reading, writing and arithmetic; in other words, that we cram the children with the "*ologies*," and neglect arithmetic, grammar, etc. The point is not well taken, for nothing is neglected; on the contrary the experience of all progressive educators is, that the faculties of children are more easily stimulated by the forms and manifestations of nature than by the books and blackboards of the school room. The pupil who has been interested in learning something about plants, animals and minerals, proceeds from such exercises to the ordinary studies of the school room with a brighter mind, and really makes more rapid progress.

Moreover, it is worth any amount of care and effort to awaken in children a genuine fondness for observing and studying life in all its varied natural forms. It occupies their minds to the exclusion of less profitable and more exciting matters; it leads to study and reading that elevates and informs; it tends more powerfully than anything else to destroy or altogether prevent the formation of a taste for immoral books and sensational reading.

THE HIGH SCHOOL AND THE TRAINING DEPARTMENT.—The High School still continues to give evidence of its prosperity and usefulness by the number of pupils who are attracted by the advantages which it offers.

The average register of the school during the past year has been 442, and the average attendance 432. The per cent. of attendance, when compared with the average register, is 97 7-10.

The average number of pupils to a teacher, not including the Principal, is 49. The average number of pupils in the grammar departments of the other schools of the city varies from 28 to 41.

The average number of pupils to a teacher in the first grade of the grammar departments, the grade from which students enter the High School, is not more than 25.

Could the High School pupils be as cheaply taught if remanded to the grammar schools?

Number of graduates from the High School and the training department who intend to teach, 74. Total number of graduates, 87.

During the last three months of this year, death has taken from us three of our most promising, faithful teachers: Miss Flora Houston, Miss Helene S. Martin, Miss Alice M. Butterfield. We cannot let this opportunity pass without bearing witness to the worth of those who, in the morning of their lives, ceased from their labors and entered upon the great vacation. Their professional lives, though but in the flower, gave promise of ample fruitage. Though the frosts of death have destroyed the blossoms, and the world takes little note of its loss, yet in their own circle of friends and among the scholars and fellow teachers who so well knew their worth, they will long be remembered and lamented, and all those who know the worth of pure and capable teachers like those we have just lost, will rejoice that their names are held up for honor.

NEW BRUNSWICK.

HENRY B. PIERCE, SUPERINTENDENT.

To E. A. Appar, State Superintendent.

Early in the vacation I sent you the statistics of our city schools for the year just closed. An examination will show but little variation from the reports of previous years. I hope, however, that the work done exhibits an improvement each year over the preceding one. A larger number of pupils are promoted than formerly, and a much larger number are reaching the higher classes in the schools, showing that the value and advantages of a good education are becoming more and more appreciated in the city. Business men are calling almost daily for assistants who have acquired, not only the scholarship that is attained in the schools, but

for those who have formed fixed habits of promptness, regularity and industry which every good school aims to inculcate.

The State, under the new law, is doing much for the schools, and it has a right to demand excellent results in return. Do the results justify the outlay? I unhesitatingly answer in the affirmative, and yet as one of the teachers in the State, I think much more could be accomplished, provided a much larger number of teachers could be made as good as are the best. Our present method of permitting all applicants who obtain third-grade certificates that can secure positions, to enter the profession of teaching without any preliminary training, must result in a great deal of empirical teaching, which in itself would not be so disastrous if only the teachers were the sufferers. Fifty children are experimented upon, and the year passes with little or no progress. Time is wasted and money expended uselessly. If there were but one school of this kind in the State, the injury of employing an inexperienced, incompetent teacher would be felt by only a small community, but instead of one new teacher, there are employed throughout the State probably 600 new teachers every year, or in other words 600 experimenters practicing upon 30,000 children. What must be the results? partly good, but mostly bad. It may be answered, and I admit that the answer must be accepted, that "necessity compels the employment of inexperienced teachers or the schools must remain closed." Is there no remedy? The Normal School cannot furnish the required number of trained teachers. Each year it sends forth between forty and fifty graduates—not one-tenth of the required number. Newark and Jersey City in a measure prepare their own teachers, but still a large majority of the new teachers each year must enter upon the duties and responsibilities of teaching with no clear knowledge of their work. The only feasible remedy which presents itself to me, is to do away with our present "County Teachers' Institute," and put in their place a "Congressional District Normal School," which shall hold a session of at least four weeks of five days each, and five hours each day. Grant no third grade certificates, unless the applicant has attended the District Normal School, and has proved himself competent to receive it. Perhaps the month of August would be the best time for holding these schools. The school should be organized into classes, and a regular programme of recitations strictly followed. All the branches required for a third grade certificate should be taught, paying special attention to the manner of teaching each. Reading should be taught, not for the purpose of making elocutionists, but to make good teachers of reading. Good methods of teaching numbers from the first principles to what is embraced in our common school arithmetics should be carefully presented. Geography, grammar, spelling and penmanship should be so taught, that the pupil receiving instruction can go out at the close of the school and put the same methods into

successful operation. In addition to the studies required for a certificate, one period each day should be devoted to the study of the "Theory and Practice of Teaching." At this hour, methods for the organization of schools, the manner of conducting recitations, the securing of good order, the best means of discipline, and all the minutiae of a good school, should be made as plain as possible.

A District Normal School composed of counties that form a Congressional District, properly conducted, could not fail to produce excellent results in our schools. Would not such schools be expensive to the State? No. Seven schools, such as described, could be taught, and well taught, during the month of August, at an average expense of not more than \$500, or an aggregate of \$3,500 per year. Twenty-one County Institutes now cost the State \$2,100, so that the difference in expense would be only \$1,400 per year, while the difference in value which must accrue to the State would be more than ten times the difference in cost. In the foregoing I have simply made the suggestion of what I think would do much to relieve our State from the injury innocently inflicted by inexperienced teachers. Matters of detail, such as a law, expense, compulsory attendance, granting certificates, &c., I leave for future consideration, believing that the way can be devised for such schools without difficulty when their benefits are demonstrated to our citizens.

PERTH AMBOY.

DAVID STEVENSON, SUPERINTENDENT.

To E. A. Apgar, State Superintendent:

The whole number of pupils enrolled during the past year has been six hundred and one. Only four of whom were present every school day. Three hundred and thirty-three attended school less

than four months. The average number in attendance during the school year has been only two hundred and ninety-eight. The irregularity of attendance for the past year has been most lamentable. Truancy has been of frequent occurrence, and tardiness has prevailed to an alarming extent. Three hundred and forty pupils were not once tardy during the year, and yet there were two thousand six hundred and ninety-two cases of tardiness. These facts are very discouraging, though not so discouraging as some of the facts relating to the preceding year.

When I entered, about eighteen months ago, on my duties as City Superintendent, I found the school in a most deplorable condition. There were four teachers who held no license, although three of them had for years received public money as teachers. I soon discovered that they were very deficient in scholarship, and had very little tact in imparting instruction. At my suggestion the Board required them to undergo an examination for licensure. Their examination was very unsatisfactory, but such was the prejudice in the community that it was deemed advisable to license them for one year. We established teachers' monthly institutes for the purpose of instructing the teachers in methods of teaching. At the first meeting of the institute, I tested their knowledge of the rudiments of arithmetic, and not one of the four teachers who were teaching without license, could explain the principles involved in subtraction. At the close of the school year, I recommended the Board not to re-engage the teachers who were incompetent. The Board adopted the recommendation and appointed competent teachers, but such was the prejudice of our citizens against employing young ladies whose parents did not reside in Perth Amboy, that they petitioned the Board to reconsider their action. The Board granted the petition, and re-instated the teachers, subject to an examination. The President of the Board, C. B. Parker, Esq., protested. The teachers failed to pass a satisfactory examination, and the Board appointed in their place graduates of the State Normal School, who are doing most satisfactory and excellent work. Last year all our teachers, with the exception of the principal, held third grade certificates. Now we have only two teachers who hold third grade city certificates. Three other teachers have second grade, and the remainder first grade certificates. We have a new principal, and three other new teachers, all of whom are thoroughly competent. The improvement in the school is already very marked. The attendance has greatly improved, and the cases of tardiness are comparatively few. We have increased the salaries of some of our teachers—the lowest salary is \$40 per month. I have taken the position that we ought to secure competent teachers, and pay them reasonable salaries, but many of our citizens think that any young lady who can read, write and spell tolerably well and who can re-

peat the multiplication table correctly, is competent to teach in the lowest class of the primary department.

Our citizens have been indulging in a Rip Van Winkle sleep so far as the interests of the public school are concerned, and like most sleepy children are angry with the person who has awaked them.

PHILLIPSBURG.

JOSEPH H. BRENSINGER, CITY SUPERINTENDENT.

To E. A. Appgar, State Superintendent :

Our schools during the past year have exhibited more than the average amount of advancement, each department has been working under the *curriculum* which I arranged several years ago, and have revised somewhat every year, as experience and the demands of the schools have required. The matter of property, bequeathed to the Town for school purposes, which I adverted to in my report last year, has not been definitely settled yet. The Board of Education is waiting anxiously for the decision of the proper authority, as it may be able then to make a more advantageous distribution of the schools.

The Board has made arrangement to relieve the over-crowded primary school in the Second Ward, which will be a great relief to the teachers of that department, and more beneficial to the health of the pupils.

Three new Commissioners were elected last Spring, and Jacob B. Smith, Esq., was re-elected for a term of three years. Isaac Vanatta, Esq., was elected President of the Board for the fourth time. He is impartial in his decisions, well versed in parliamentary rules,

and a good presiding officer. The Board increased the salary of the principal of the High School six per cent., and the other male principals eight per cent. on the salaries of last year.

Twelve members graduated from our High School in June last. The exercises were held in the Main Street M. E. Church, the best auditorium in town. We now have 93 members in our High School; 15 in the A class, 29 in the B class, 25 in the C class, and 24 in the D class.

E. C. Beers, A. M., our very efficient principal, will remain with us next year. He is a young man of more than average ability, and has been eminently successful. I am sorry to chronicle the departure of Mrs. C. W. Conch, who has been lady assistant in the High School since its organization. She has devoted more than twenty years of her life to the cause of education, and will leave a vacancy in this department which we will have some trouble in filling as well as she has filled it. She was noted for her conscientiousness in the performance of every duty, and during the whole time she taught, she was an untiring student, thereby rendering herself a more efficient instructor each year. We wish her a continuous round of happiness and domestic felicity.

REPORTS OF COUNTY SUPERINTENDENTS.

ATLANTIC COUNTY.

S. R. MORSE, SUPERINTENDENT.

To E. Appgar, State Superintendent :

SIR :—I again have the pleasure of submitting the yearly statement of the condition of the public schools of Atlantic County.

The change in the school law, in regard to the time the census is to be taken, brings the financial and census reports at different times, and has caused much delay in their return to me, thus causing me much more work and some delay in my report.

FINANCIAL.—The amount of district tax voted for teachers' salaries is \$5,017, being \$2,346.55 less than last year. The amount raised by the towns and townships is \$5,200, being \$244 less than last year, making \$2,590 less for teachers' salaries than last year. The amount raised for buiding, repairing, &c., is \$11,588.20, being \$795.54 more than last year. Of the amounts, \$3,600 for teachers' salaries and \$8,200 for building were raised in Atlantic City.

We received last year for the first time the surplus revenue. This year it amounts to \$534.81.

The total amounts of State money, surplus revenue and district tax for the ensuing year, is \$43,719.29, with a balance for teachers' salaries of \$5,859, being \$2,477.42 more than last year. The valuation of school property has increased \$13,800.

The number of schoolable children in the county last year was 5,329, this year 5,257, a decrease of 72. The increase in Atlantic City is just 100, making the decrease in the rest of the county 172. A large part of the increase in Atlantic City is, no doubt, from the county, while many more have moved to Ocean City, a new Summer resort, in Cape May county. The schools have been kept open .4 of a month longer the last year than in the year preceding.

There were enrolled 78 less this year, while the average attendance has been 69 more than the year before. The number attending private schools has increased from 54 the previous year to 93 the present year. It is becoming quite common for pupils to board at home and attend school in Philadelphia, going back and forth each day on the railroad.

The estimated number who have attended no school has decreased from 1,385 in 1881 to 1,319 in 1882. The number of male teachers has been 34; at an average salary of \$50.20, against 32, at an average salary of \$48.15 the year before.

The number of female teachers has been 44, at an average salary of \$36.04, against 45 at an average salary of \$33.57 the previous year. The increase in salary is very small, but it shows that the tide has turned, and we hope it will rise till a fair compensation is given our hard-worked teachers. These comparisons show that our schools are still advancing in the right direction.

There has been no change in the boundary of school districts during the past year; and no difficulties to settle of note. Some of the districts have become so small, I fear they will have to be abolished soon.

SCHOOL HOUSES.—A new school house has been erected in Lake district, No. 51, Hammonton; the money for which was voted and raised by the town of Hammonton. It is unusual for a town to vote to raise money for a district school house, and the act reflects credit on the voters of that town. In Atlantic City, No. 1, two fine rooms have been added to the Indiana avenue building, and a new house commenced on the Pennsylvania avenue lot, which cannot be completed at present, owing to an injunction placed thereon.

East Vineland, No. 28, and Gravelly Run, No. 39, have reseatd their rooms with the latest style desks. Repairs have been made in several other districts. In No. 49, Central Hammonton, the

grounds have been graded and the house repainted and repaired. In No. 38, May's Landing, heaters have been put in the cellar to warm the house, and repairs made. The following districts are sadly in want of new school buildings: No. 2, Brigantine; No. 9, Centerville—the house here is a disgrace to the district and county; No. 10, Oceanville; No. 12, Absecon—there is no excuse for this district; No. 24, Estellville; No. 39, Gravelly Run; No. 40, Carmantown, and No. 46, Wicksville. Three of these districts wanting new school buildings, Nos. 2, 9 and 10, are in Galloway township; two, No. 39 and 40, in Hamilton; one, No. 12, in Absecon town; one, No. 24, in Weymouth, and one, No. 46, in Mullica.

SCHOOL VISITS.—I have visited every school under my supervision twice; many three times, and some four or five times.

The whole number of visits made is 174, the number of districts 46.

This number of visits has taken a large part of my time.

When first appointed Superintendent it was my custom to notify the trustees and teachers of my intended visit, but now I do not let them know when I am to call, but try to find them in their every day dress and not their "Sunday best."

I can see that it is a much better plan, as they are expecting me at any time.

TEXT BOOKS.—There has been no change in the list of text books; and both teachers and trustees express themselves as much pleased with the list adopted.

Every year the number of districts grows less, that does not furnish the text books free, and I hope the time is not far off, when every district in the county will so furnish them, as it is the only way to have schools free in reality as in name.

The benefits of this plan have been so ably presented by our worthy State Superintendent, it is needless for me to add more.

LIBRARIES, &c.—The following districts have raised the amounts of money required by law and received the amounts appropriated by the State: No. 1, Pennsylvania, Indiana and New Jersey avenue schools, C. E. Morse, Principal; No. 15, T. J. Clark, Principal; No. 16, W. B. Matthews, Principal; No. 18, A. H. Wilson, Principal; No. 32, C. A. Gross, Principal; No. 50, M. Emma Haskell, Principal. Nearly all of this money was expended for books of reference, maps, charts, globes and philosophical apparatus. The following districts have never received any of the library money from the State: Nos. 2, 9, 10, 24, 25, 27, 33, 34, 35, 40, 42, 43, 45, 46, 48, 51. We hope this number will be made smaller before the close of another year.

The course of study, adopted three years ago, was used the past year with a few changes. The annual examination of the schools was held the first week in April, and showed that good work had been done. In most cases these examinations show where the good teachers are, and where the drones are.

The examination lasted five days. The papers are all brought to me, then assorted, all the papers in each branch being put together, and sent to a committee of teachers, who examines them, marks them on the scale of 100 and returns them to me.

The following pupils passed the advanced and regular course, and received the Certificates of Honor, and the Diplomas :

NAMES OF THOSE WHO RECEIVED CERTIFICATES OF HONOR :

MARIETTA CONOVER.....	Centerville, No. 9.....	Albert E. Conover, Teacher	
LILA HIGBEE.....	Absecon, No. 12	David Altemus,	"
EMILY G. SCULL.....	English Creek, No. 22....	James B. Rogers,	"
MARY HUDSON.....	May's Landing, No. 38...	C. J. Adams,	"
EMMA VEAL.....	"	"	"
ROBERT INGERSOLL.....	"	"	"

GRADUATES.

NAMES OF THOSE WHO GRADUATE AND RECEIVE DIPLOMAS,
CLASS OF 1882.

<i>S. Port Republic, No. 7,</i>	Katie M Dudek, Teacher :
Clara Caveleer.	
<i>Absecon, No. 21,</i>	David Altemus, Teacher :
Joetta Turner, Eva Champion, Harry Champion.	
<i>Pleasantville, No. 16,</i>	F. J. Clark, Teacher :
Ella Ingersoll, L. H. Lake, Lena Leeds.	
<i>Bargaintown, No. 18,</i>	Albert H. Wilson, Teacher :
Julia Frambes.	
<i>English Creek, No. 22,</i>	J. B. Rogers, Teacher :
John P. Smith.	
<i>Hackinsville, No. 25,</i>	Hannah Johnson, Teacher :
William Campbell.	
<i>Tuckahoe, No. 26,</i>	E. E. Goff, Teacher :
Ambrose Clark.	
<i>Egg Harbor City, No. 47,</i>	A. G. Masius, Teacher :
Ida Messer.	
<i>Hammonton, No. 50,</i>	Emma Haskell, Teacher :
C. Anderson, Oak Road.	

Two hundred and eleven pupils received certificates of merit. The number of graduates is much smaller than it has been before since we adopted the course. This is owing in part to the better working of our plan.

The pupils take a less number of studies at one time, which takes longer to complete the course, but will be a great advantage to those who complete the course.

We propose to make some changes the coming year, hoping in time to perfect the course.

TRUSTEES AND COLLECTORS.—The trustees are generally persons who have the interests of the schools at heart, and have given me their support in the good work.

The collectors have performed their duty faithfully, and the school money was never more promptly collected and paid out than during the past year. Much credit is due them for the present good condition of the school finances.

TEACHERS' ASSOCIATION.—The meetings of the association were held once in two months. They have been well attended, and have done much good. They have become a part of the school system of our county, so teachers who do not attend them, cannot keep up with the times and compete with those who do.

At these meetings we lay out the work, so that all may labor under one system arranged and adopted in part by themselves.

EDUCATIONAL JOURNALS.—During the past year I have said and done much to have every teacher in my county take or read one or more educational journals. Of the seventy-eight teachers, all but five took at least one, and some two or three educational journals. This has been a great benefit to the teachers and schools. No teacher should be without at least one first-class school journal. If the teacher is too poor to take one himself, the trustees should take one for him, and if he is too lazy to read it, the trustees should get another teacher.

TEACHERS.—There were many changes in teachers during the past year, which has been against the success of the school.

There is a class of teachers I must name "tramps," who go from one county or State to another for positions. They stay in one place long enough to show their utter disqualification for the work, then are turned away, take up their satchels and tramp to some other place where they are unknown.

These teachers write to the County Superintendent for names of district clerks, then to the trustees, saying they have been informed by their superintendent that they are in want of a teacher, or that through the superintendent they have been induced to apply for the school, thus deceiving the trustees and misrepresenting the superintendent. I am sorry to say that many of these tramps have

letters of recommendation from trustees or other persons of some note. There should be some way to get rid of this class, who do so much to lower the standard of our teachers, and work such great injury to our schools. Trustees should be careful about hiring teachers whom they know nothing about, although they may recommend themselves in such glowing terms.

PRIMARY TEACHERS.—I am still more convinced that we should have trained and experienced teachers in our primary schools.

We can only do this by paying the primary teacher higher salaries.

In some of our graded schools the trustees are in the habit of hiring young, untrained and inexperienced teachers, and giving them the same salary as teachers of long experience or who are educated for their work.

This is a great injustice, and very discouraging to the better teachers. When will this old, erroneous idea that any teacher is good enough for small children be outgrown?

DEATHS.—During the past year we have lost three of our teachers by death. Miss Ada Seely and Frank Montford, of Hammonton, and Mrs. Josephine Doughty, of Pleasant Mills. They were good teachers, and our county has lost in them good and faithful servants.

TEACHERS' EXAMINATIONS.—I have been assisted by Messrs C. J. Adams, W. B. Matthews and A. G. Masius, who have rendered faithful and impartial assistance.

The meetings have been held in the Egg Harbor City school-house.

We have examined one hundred and seven applicants, fifty-one of whom received certificates, the remaining fifty-six being rejected. There were granted ten first, eight second, and thirty-three third-grade certificates; 52 1-3 per cent. of the applicants were rejected.

More first grade certificates have been granted this year than in any one year since I have been superintendent. Most of the teachers seem anxious to hold the highest grade certificate. We do not grant certificates to applicants from other counties unless they bring letters of recommendation from the superintendents of the counties in which they have been teaching.

The following have received first grade certificates: J. B. Rogers, Anderson Bourgeois, J. P. Sherman, Donald L. Merrill, C. J. Adams, Nettie Risley, M. Emma Haskill, Pollie Frambes, H. B. Whitney and Arthur Pressey. Mr. A. G. Masius has received a first grade State certificate.

CONCLUSION.—In conclusion I extend my thanks to the collectors, trustees, teachers and parents for their kind treatment and assistance. The people of Atlantic county are alive to the interests of their public schools, and are willing to do all they can to help on the good work.

BERGEN COUNTY.

JOHN A. DEMAREST, SUPERINTENDENT.

To Ellis A. Appur, State Superintendent.

In compliance with law, I have the pleasure of submitting my seventh annual report of the condition of schools in Bergen County for the year ending August 31st, 1882.

THE STATISTICAL REPORT accompanying this has been carefully prepared. The tables show a decrease of eleven in school census, an increase of one hundred fifteen in school enrollment, and one hundred eighty-three in average attendance. The number who have attended private schools has decreased two hundred seventy-seven, and who have attended no school increased one hundred fifty-one. The usual amounts for repairs and teachers' salaries having been voted, our financial condition remains very much the same. Hence, as a whole, only slight changes are exhibited.

SCHOOL HOUSES have received proper supervision, and the wants and comfort of the children due consideration. The valuation of school property has increased \$7,250. The attention of trustees has been repeatedly directed to the necessity of beautifying their buildings and grounds, supplying ventilation other than doors and windows, and providing the teacher with sufficient tools to perform work. These conferences have done much good and been the means of making many needed reforms. Two new buildings have been erected during the year at a cost of \$6,000. The one a fine two-story brick building at Garfield, in district No. 42, and the other a beautiful frame building at Masonicas, district No. 60. Repairs generally have been made, black-board space added, and new and improved furniture substituted in many cases. District No. 1, in order to supply the wants of the district, has been forced to put an addition to their old building, and open another department. District No. 35, Lodi, is contemplating the same thing for

the same cause. We have now only one poor school house in the county—the rest can be classed as good and well adapted for work.

SCHOOL LIBRARIES have been established this year in districts No. 36 (school No. 2) and No. 57. Districts No. 6, 15, 36, 37, 40, 40½, 41 and 45 have added to those already established. Twenty-nine schools now have availed themselves of the benefit of the *Library Act*, and established either a library or purchased apparatus—sometimes both. It is hoped that each district in the county will speedily accept the generous offer of the State and thus banish from the house the questionable literature of the day, or through this means supply their rooms with the necessary apparatus.

FOUR QUARTERLY EXAMINATIONS have been held during the year, in accordance to law, to accommodate applicants. During these meetings twenty-nine males and sixty-one females applied for certificates, of which twenty-eight males and fifty-four females succeeded in passing the required examination. Certificates have been granted to them as follows, viz.:

First grade granted to males.....	11
First grade granted to females.....	3
Second grade granted to males.....	7
Second grade granted to females.....	16
Third grade granted to males.....	10
Third grade granted to females.....	35

Making a total of..... 82

Hence it will be readily seen that nearly one-half of the applicants aspired for the highest grades.

TOWNSHIP MEETINGS have been convened in different parts of the county. The attendance was not so large as in former years, for some cause unknown, still they are sources of encouragement. From the improved action in the general work of many of our trustees, I must conclude that these meetings are exercising a silent influence for good.

SCHOOL VISITATION has been faithfully performed—all the departments have been visited twice, and some a greater number of times. It has afforded me much pleasure to meet the little ones, see them at work and listen to their recitations. In most cases they were orderly and studious, trying to improve the time and grasp the golden opportunities as they passed by. I have always tried to speak words of encouragement, and to render them all the assistance possible. The teachers generally were found active and zealous, making every effort toward advancement. Our schools have materially improved in character, and are making rapid strides toward a high standard of excellence.

Four new departments have been added the past year. Forty-eight male and sixty-five female teachers have been employed at an average salary of \$63.52 per month for males and \$38.62 for females. The classification of their certificates is as follows, viz.:

Number holding first grade State	6
“ “ second “ “	12
“ “ third “ “	5
“ “ first “ Cnty	34
“ “ second “ “	30
“ “ third “ “	26

Total..... 113

This record is worthy of notice, and doubt if it can be equalled by any rural county in the State. From the rapid disappearance of third grade county certificates it can be safely predicted that the time is fast approaching when it will be a rare thing to find one within our limits. Our teachers are restive and dissatisfied until they have reached the highest the county can give them.

OUR SECOND ANNUAL EXAMINATION was held in the schools of the county April 6th, and continued seven days. Nearly all the schools participated in the same and produced some very gratifying results. A marked difference for the better was noticeable in all the papers. While it was a severe test and ordeal for our pupils to pass through, still they nobly endured the same, learned lessons which will benefit them through life, and achieved honors never to be forgotten. Fifty-three passed successfully the fourteen studies, one hundred forty-three in eight or more but less than fourteen, and one hundred twenty-four in four or more but less than eight. These figures show more conclusively than words can express that time has not been wasted, but judiciously improved. These examinations have adden new life and renewed interest in the school room, and been the means of accomplishing a great deal more work. The teacher now has an object to reach and the pupil an incentive to study.

OUR SECOND ANNUAL SCHOOL COMMENCEMENT was held in the Athaneum Building, Englewood, June 30th, at 1 P. M. Long before the hour of meeting the town was thronged with visitors from different parts of the county, and the moment the doors were opened the building was filled with a select and appreciative audience. The programme which consisted of essays, recitations and music was well arranged, and elicited much favorable comment from the press and public generally. The essays were well written and rendered in an impressive manner; the recitations were of a

high order and displayed considerable elocutionary power, and the music was grand, enlivening the occasion. All who took part in the exercises showed careful training, acquitted themselves creditably, and conferred honor upon themselves and instructors. Before the diplomas were awarded, Dr. Hasbrouck, Principal of the New Jersey State Normal School, spoke words of encouragement, and advised them "to go boldly forward in the name of the Lord not for luck but with pluck." These commencements are creating a deeper educational interest, and have given the public school a stronger grasp upon the affections of the people.

THE ANNUAL INSTITUTE was opened in the State Street School building, Hackensack, April 7th, at 10 A. M., and continued in session until the afternoon of the 19th, with Prof. A. C. Apgar, of the State Normal School, and Prof. Houck, of Harrisburg, Pa., as conductors. All the teachers of the county were present except two, who were absent through sickness.

Prof. Apgar treated the subjects of light, electricity, sound and color in his happy, entertaining manner to the entire satisfaction of all. His methods of teaching arithmetic and geography were simple, practical and so good, that teachers made special notes for use in the school room. The institute was entertaining and instructive, and its members declared it a success.

Hence, in looking over the efforts of the year, I think I can safely say that progress has been made in every department of the work. School accommodations have been improved, teachers are more efficient, an increased interest is manifested in the cause of education, and the sentiments of the people are strongly in favor of our public schools. While much has been done, still much remains yet to be done. Nevertheless the year's work must be considered a success.

BURLINGTON COUNTY.

EDGAR HAAS, SUPERINTENDENT.

To E. A. Apgar, State Superintendent :

SIR:—In compliance with the law, I herewith respectfully submit my seventh annual report of the condition of the public schools of Burlington county, for the year ending August 31st, 1882.

The finances for the coming year, as abstracted from the statistical report is as follows :

The amount of apportionment from the State appropriation of \$100,000, and the State school tax, is \$67,161.08, being \$34.83 less than that of last year. The amount of interest from the surplus revenue, is \$4,363.92. The amount of tax voted for teachers' salaries is \$4,635, being \$1,232.94 less than that of last year. The amount of tax voted for building, repairing, furniture, &c., is \$13,267.64, being \$971.73 more than that of last year. The balance of State money in the hands of the township collectors, is \$13,130.34, being \$4,557.74 more than that of last year. The balance of district money in the hands of said collectors, is \$5,552.66. The total amount for school purposes is \$101,990.64.

By taking the decrease in the amount voted for teachers' salaries, and the increase in the amount of the State money in the hands of the collector, we see that there has been a leaving out of the teachers' fund, by the employment of inferior teachers at reduced salaries, of the sum of \$5,790.68 over that of the previous year. The average monthly salary last year for male teachers was only \$44.72, and that for females \$33.05.

It is strange that this money should be thus hoarded, when it is known that it cannot be used for any other purpose than that of paying teachers' salaries and for fuel. From the exercise of this false economy, we are continually losing our best teachers. It should be obligatory upon each and every district to at least use, from year to year, for the employment of the best teachers it would command, all the money that the State appropriates. Then there would be but little complaint of the inefficiency of our schools.

The following are the districts that have used too much of the State money for incidentals :

Trick District, No. 2, used \$36.93 too much ; penalty, \$73.86. Bordentown District, No. 15, used \$50.18 too much ; penalty, \$100.36. River District, No. 17, used \$46.75 too much ; penalty, \$93.50. Poplar Grove District, No. 30, used \$11.63 too much ; penalty, \$23.26. Hainesport District, No. 71, used \$45.70 too much ; penalty, \$91.40.

If these different amounts be not refunded to the State fund from a district tax, the penalties will have to be imposed. The district clerks should attend to this matter immediately.

The value of the school property in the county is \$226,200. The whole number of school children in the county is 15,357, being 104 more than that of the previous year. The average time for which the schools have been kept open is 9.5 months. Six schools have been kept open for eleven months; fifty-three for ten months and upward; forty-four for nine months and upward; two for eight months and upward; two for seven months and upward; and three for six months and upward. The schools that were kept open for less than nine months were closed for want of sufficient scholars to warrant the employment of the teachers.

The number of children enrolled in the School Register is 10,307, being 67 per cent. of the census. The estimated number of children attending private school is 1,917, being 12 per cent. of the census. The estimated number of children attending no school is 3,261, being 21 per cent. of the census. The number of children that the school houses of the county will comfortably seat is 11,215, being 73 per cent. of the census, and 109 per cent. of the enrollment. The whole number of teachers is 181, of which 127 are females.

The number of districts in the county that have from time to time availed themselves of the Library Act, to obtain books or apparatus is 38, being but 4 more than that reported for the previous year. Of this number 26 have expended their funds in the purchase of apparatus, such as globes, maps, charts and books of reference, such as dictionaries, encyclopedias, &c., &c. There is no doubt that this is the best way in which to utilize these funds, for

as a general thing the library proper is not as much used as it ought to be.

The boys' grammar school department of the St. Mary street school house, district No. 1, Burlington, has been refurnished with new cherry desks of improved pattern. They give it a light, airy and cheerful appearance.

The school house of Shore and Islands district, No. 109, has been repaired and made quite comfortable, but it still needs furniture of improved pattern to make it convenient.

District No. 42 has erected, at a cost of about \$2,000, a large new frame house, at Jobstown, upon the site of the old one that has been in use since the year 1800. The interior is divided into a large audience and class-room, and two small cloak-rooms. It is well fitted up and furnished with new desks, silicate blackboards, &c., &c. It is a credit, not only to the district, but also to the trustees who were instrumental in its erection.

Mount Laurel district, No. 80, has also erected a new house. It is a substantial one-story brick, 48 feet long, by 27 feet wide. It is divided into a large audience and class-room, a class-room, a cloak-room and a vestibule. There is a cellar under the whole of it, in which is placed the heater furnishing hot air for the rooms above. There are about 200 feet of silicate blackboard surface upon the walls. The furniture is of a very superior quality and style, and the windows are hung with shades. The cost of the whole, including house, lot, furniture, heater, &c., &c., is about \$3,000. It is a credit to the district, and too much cannot be said in commendation of the interest, energy and perseverance exhibited by the trustees in procuring it for the district, and especially by Howard Darnell, District Clerk, in the supervision of construction.

The regular examinations of applicants for teachers' certificates have been held as usual, and we have granted during the year 7 first grades to males, and 3 to females; 5 second grades to males, and 10 to females; 34 third grades to males, and 89 to females; making 148 certificates in all, 46 to males, and 102 to females. We have rejected 15 males and 52 females, making in all 67 rejections.

The fifth annual examination of the pupils of the schools of the county for diplomas, certificates of distinguishment, and certificates of merit, was held during the seven school days commencing on Monday, April 3d, and ending on Tuesday, April 11th.

The subjects for examination were the same as those for the previous year, with the exception of an additional one, the Differential Calculus, for the advanced schools.

There were 487 pupils examined, 394 of whom passed, and 93 were rejected. Of those that passed, there were 65 entitled to

diplomas ; 100 to certificates of distinguishment, and 229 to certificates of merit.

Of the 65 that passed the examination for diplomas, there will be but 22 that will be permitted to graduate, the others being less than seventeen years of age, and too young to quit school. Thirteen of the number that passed the previous year, and who have become old enough, or have quit school, will graduate with them, thus making the whole number to be 31, as may be seen in the following list :

NAMES OF THE GRADUATES OF THE CLASS OF 1882.

The commencement for these graduates will take place in Mount Holly, on the first Saturday in November. That of the class of 1881, came off in the Concert Hall, Mount Holly, on the 22d day of October, much to the satisfaction of all present, J. Walter Higgins, a member of the Alumni Association, being the orator of the day.

The Burlington schools were the only ones that attempted the examination in the Differential Calculus. Of the 28 pupils in these schools that passed for diplomas, 26 with an average age of 15 years, passed in the calculus with a general average of 78 per cent., 14 of them being girls.

Now what can be done in the Burlington schools, can be done in every other advanced one in the county, provided the teacher will but introduce the topic, however high, and discuss it with that comprehensive clearness that the subject itself suggests. In a

word, the teacher must be able and willing, when the pupil will become anxious and appreciative.

As I said last year, there are many schools in the county capable of doing much good work, that have not even attempted the examination. In contrast to the apathy manifested in such schools, we have some, under most unfavorable circumstances, doing diploma work, and hence, there is no reason why these laggards should not wake up, and kindle with sufficient enthusiasm, to produce results in all the grades, worthy of recognition.

From this it must not be understood that the teacher is to merely strive for results in examination, through the course of a miscellaneous catechism devised for the purpose. No such thing.

He must so teach, that when the topic or subject has been finished, the pupil will feel himself able to measure the breadth and depth of any of the numerous questions that the subject may suggest. With what confidence would a pupil, under such teaching, enter lists in examination, knowing full well that victory must eventually perch upon his banner!

The meetings of our Teachers' Association at Mount Holly, have been held monthly, and although we had done good work in various high study, the year before, and were able to take up and pursue Integration, not only to its grand abstract heights, but even to put it to use in the determination of the different formulæ of mensuration, and the higher applied science, as we at the close of the year had determined to do, yet when we came together in the beginning of last year, we decided that we should pursue a more elementary course. The subjects were reading, English grammar, arithmetic and mensuration as an art. And although the subjects were thoroughly discussed, yet I feel that there was very little done in comparison with what would have been done, had we adhered to our first adopted course of study. Having seen our mistake, we hope to do in the coming year what we should have done in the last.

The Association held at Burlington, and composed wholly of men, has been doing very superior work. The coming year will be exclusively devoted to the calculus of variations, and its application to the maxima and minima of curves.

The time has come when there must be outspoken truth upon a subject that is all important to the interests of our educational system. It is that of employing persons of too tender an age, as teachers in our schools. Sometimes there are some so young that they cannot even govern themselves, let alone the idea of governing the many of the school. But this is not the worst feature of the case. It is that of not knowing how to homologize and classify the minds of the different pupils endeavoring to pursue their prescribed course of study. Without a proper classification of the

school, almost the whole of the time of the teacher, that should be given to good, solid topical teaching, is frittered away in the multiplied repetition of narrow, aimless individual instruction.

Now, topic teaching being complete, must of necessity be broad and comprehensive, and no one can be successful in it unless in his descent from the general to the particular he considers the subject in all its bearings. Hence, without full time, this kind of teaching is impossible in any degree as that which is imperfectly laid as a basis upon which to subsequently build, must sooner or later prove the destruction of the temple.

Instead of having the grand end and aim of the topic in view, young teachers are almost invariably too well satisfied with the parrot-like recitation of isolated facts with the recognition of even seeming relation among them, believing that this memorizing process will eventually prove the genuine upbuilding of the scholar. In the course of time no envelopment of numerous facts being recognized in a single simple principle, and the memory being overburdened, the pupil necessarily fails to meet the sanguine expectations of the teacher. Now it is that the teacher doubts the capacity of the pupil, not knowing that it is he himself that is at fault? What is his remedy? That of turning the pupil back, believing that a review of a stale fault in the memorizing of isolated particulars will accomplish that which only fresh, original and comprehensive instruction can. How absurd! And the oftener the review is made the worse it becomes, until finally the pupil loses confidence in the ability of the teacher, and leaves the school as no fit place for the development of *his* faculties of so peculiar and inquisitive a turn. So great is this evil that it robs our schools of all their pupils capable of original, manly thought, and reduces our boasted higher to merely primary departments.

By making the minimum age of eligibility to the profession of teaching to be twenty years, we would soon have a corps of teachers with three or four more years of preparation and study to not only keep up, but to elevate still more and more the said higher departments of our schools. And in order that these means for the person's fitness for teaching may not cease here, there should be a law to compel teachers living within accessible and convenient distances of the place of meeting to attend monthly meetings of a teachers' association, where new study and the theory and practice of teaching it could be had in all their comprehensiveness and application.

With such a law carried into effect, our teachers would soon be all enthusiasm, and the great trouble in the want of attendance at school on the part of the larger pupils would soon be a thing of the

past. The different studies would be topically communicated as a means to an end in the gratification of inquisitiveness.

How soon would the pupils see the relation of fact to fact, of principle to principle? Through anticipation they would apply their recently acquired strength in the solution and determination of fresh problems and questions. In a word, there would be no end to their study, so anticipative and inquisitive would they become.

In no other way, with so little expense, could there be so much good done to our schools as in the effectual working of a monthly association composed of teachers of vigorous age.

In conclusion I must express my most sincere thanks for the hearty co-operation of all with whom I have had official relations, and especially for the timely advice and support of our worthy State Superintendent.

CAMDEN COUNTY.

F. R. BRACE, SUPERINTENDENT.

To Ellis A. Apgar, State Superintendent :

SIR:—Herewith I present to you the report of the condition of the public schools in Camden county for the year ending August 31st, 1882.

FINANCE.—The amount of district tax voted for teachers' salaries is \$22,877.70, being \$1,651.90 more than last year; the amount for building, &c., is \$39,520.30, being \$3,380.90 less than last year. The total amount of district tax the year is \$62,398, being \$1,729 less than last year.

The amount of State school moneys is \$62,981.06, which is \$788.40 less than last year. The total amount from all sources is \$126,908.77, being a decrease of \$2,970.19.

While the average salary in the entire county for male teachers is \$63.08 per month, in the district outside of the cities it is only \$38.23. The average salary for female teachers in the villages and county districts is \$37.46, which is somewhat more than the average salary in Camden, but less than that in Gloucester City. The amount paid to male teachers is so small that very few competent men can be found to take the position of teacher. When they do take it, it is only to make it a stepping-stone to something higher, and so they remain in the profession not more than two or three years, perhaps not more than one, and then go into some other business, whose rewards are greater.

SCHOOL HOUSES.—Nearly all our school houses are in good condition, well built, well lighted, well seated. Ventilation is not yet as well attended to as it ought to be. The general method is by windows and doors. All our teachers, with perhaps two or three exceptions, are very careful to keep their rooms in a pure, healthful condition, regulating heat and draft so as to keep the children warm and yet keep the air pure. In this connection it might be said that in four-fifths of the schools the subjects of physiology and hygiene are taught, so that the pupils are made acquainted with the great laws that govern the physical nature, and the rules necessary to be observed to preserve health.

Four new school houses have been built; a two-story building in Rosendale, No. 4, and one-story buildings in Champion, No. 10, Irish Hill, No. 16, and Mechanicsville, No. 20. They are all large, roomy, well-arranged buildings. In the last two districts they were very much needed. At a meeting held in Greenland, No. 15, the inhabitants assembled, voted to build a school house for the white children. The need was greater than in any district in the county, but through some informality the proceedings were considered illegal, and the building of this school house has to be delayed another year.

SCHOOLS.—Our work has made steady progress through the year. The course of study prescribed for the schools in the county is gradually bringing every school up to a higher grade. The publication of the names of the pupils who have passed successful examinations in connection with the course of study, and of the districts where they attend school has had an excellent effect. If the name of a school district is not found on the list, the trustees and parents ask the question, "How is it that our district does not appear on that list?" And when they understand that it is either because they have taken but little interest in the school or because a teacher

has been employed that has not the ability either from lack of education or lack of force to do it, a little revolution is very often speedily accomplished. In the schools where pupils have completed the course of study and passed the examination, the teachers hold or have held either State certificates or first grade county certificates, there being only three exceptions, and one of these holds a second grade certificate. Those who are content year after year with a third grade county certificate cannot do our work, and ought not to be employed in an ungraded school where all branches and the higher departments of these branches are required to be taught.

[It is pleasing to know all the pupils who have passed our examination and have applied for admission to the State Normal School, not one has been rejected. The worthy principal of the school, Dr. W. Hasbrouck, bears testimony to the scholastic qualifications of our graduates who have applied for admission. Dr. Merrill E. Gates, the recently elected President of Rutgers College, says that he believes that our graduates can easily pass an entrance examination for the scientific and agricultural departments of that college. Since that is so, I think we shall be able to send the full complement of students from this county next year. Every teacher in the county will know what qualifications are necessary in order to enter the college, and the work will be arranged accordingly.

It has been a long cherished desire of mine to bring about an immediate connection between the district schools in this county and the higher institutions in the State, and to this end the course of study was instituted and afterwards modified and enlarged from year to year. Nothing was done suddenly; progress was gradual; there was a continual reaching to a higher standard. In this effort I have been nobly sustained by nearly all our trustees and nearly all our teachers. Now we have reached the point where connection can be made. In the cities where high schools have been maintained, this was accomplished years ago, but in the country districts there seemed to be no hope of ever accomplishing it. To-day the hope is as bright for the country district as for the city.]

Of the districts that furnished graduates the last year, six might be called village districts and nine country districts. Besides these thirteen districts reached second grade. Never was the state of education more hopeful in this county.

In nearly all of the above districts, commencement exercises were held which I attended, and at which the diplomas and certificates were given. In nearly every instance the rooms were crowded with interested spectators.

GRADES.—According to scholastic merit we have now sixteen districts first grade, thirteen second grade, and thirteen third grade. A strong effort will be made the coming year to bring up those districts that are in the lower grades to a higher position.

ATTENDANCE OF PUPILS.—The percentage of average attendance on average term enrollment has been about the same as the past few years. Those having above seventy per cent. are Greenville, No. 6; Waterford, No. 33; Ellisburg, No. 7; Milford, No. 28; Blackwood, No. 21; Haddonfield, No. 12, and Winslow, No 41.

TEACHERS.—Excluding Camden and Gloucester City, the teachers in the county numbered fifty-six, of whom fourteen were gentlemen and forty-two ladies. Five were graduates of the State Normal School, and seven were undergraduates. Two were graduates of the Girl's Normal School, Philadelphia. Six held State certificates; nine, first grade county; twelve, second grade, and twenty-nine, third grade.

One hundred and three persons presented themselves as applicants for teachers certificates; eighteen gentlemen and eighty-five ladies, of whom seven gentlemen received certificates and eleven or sixty-one per cent. were rejected, and thirty-seven ladies received certificates and forty-eight or fifty-six per cent. were rejected.

The successful applicants for first grade were Newton C. Holdridge, Emma Bolton, Lizzie M. Schuyler and Abbie Dubois.

The Teachers' Association has met regularly, and has been of great service to the teachers. We have had the valuable assistance of Professor Masius, of Egg Harbor City, County Superintendent Morse and Mrs. Morse.

TRUSTEES.—The Trustees have been very helpful in our school work. They are especially anxious that something of greater help to the farming interests shall be accomplished. While the little text book, Lupton's Elements of Agricultural Chemistry, used in our schools is a very excellent one, still it does not quite meet our need. A committee, consisting of Hon. S. W. Nicholson, Messrs. S. Betts and Van B. Giffin, was appointed with myself to confer with Dr. M. E. Gates, of Rutgers College, on the subject of bringing our course of study into harmony with that pursued in the college, so that our graduates may be able to enter the agricultural department of that college. The duty was performed, and a very interesting conference held with Dr. Gates and Professor Cook.

MISCELLANEOUS.—Accounts of township collectors and district clerks have been compared and found correct. All financial re-

ports have been received from collectors and district clerks. The usual reports required by law have been received from city superintendents and district clerks, except from the city superintendent of Gloucester City, who has failed to send his in.

Mrs. R. H. Strong still assists me in the work of examination.

One hundred and thirty-seven visits have been made to the department in the school districts; fifteen meetings of township boards of trustees have been held; four examinations of candidates for teachers' certificates have been conducted; all the schools have been examined in accordance with the course of study; and twenty-two meetings have been held with trustees, teachers, inhabitants, &c.

CAPE MAY COUNTY.

E. P. SHIELDS, SUPERINTENDENT.

To E. A. Apgar, State Superintendent:

I herewith submit my annual report for the school year, ending August 31st, 1882.

The census taken this Spring shows the whole number of children to be 22 less than last year, and 22 more than in 1880. The average number who have attended during the school year is 86, larger than the previous year, and only a little more than one-half the census. The number enrolled in the school register was 2,217, while 54 are reported as attending private schools, and 345 as attending none. About one-half of the average number (659) attending during the year, were present between six and eight months; while a large proportion (724) were present less than four months. The schools have been kept open not quite nine months (8.75). At least twenty schools report the full term.

The average teachers' salaries are about the same as in 1881, there being a gain of \$2.01 for females, and a decline of .74 for males. The former ranging from \$13.33 to \$49, and the latter \$26.66 to \$76.66. If the best are but poorly paid at the best, what is true as to those receiving the minimum named? Upper and Dennis townships added to the State funds a sum equal to one dollar and fifty cents per child, and the city of Cape May about four dollars per child. In five districts \$1,857.63 was provided in lieu of township tax by direct district tax. A total amount of \$16,967.77 was received from all sources for public school purposes, of which there remains an unexpended balance in collector's hands of \$3,127.41. With a reported expenditure of less than six hundred dollars for repairs, and in the face of this balance, it seems as if the average salary ought to have been larger. Nor is it strange that nearly one-half of our schools will be found in the coming year to have made a change of teachers.

At Ocean City, organized as No. 29, in August, 1881, a school was opened in a hired room, and conducted for the year by district tax. The new building, which was completed for occupancy before winter, is a two-story frame structure, 50x44 feet in dimensions, with a front wing at the front entrance for a vestibule. There are two equalized rooms below, in one of which school was held last Winter. The upper story is in one large room, capable of holding an audience of two hundred and fifty persons. The roof is of slate, and the foundation is solid brickwork to the height of six or seven feet, with a large cistern of brick. Total cost, \$6,000.

District No. 7 (Steelmantown) has been united with District No. 6. As their school building was destroyed by fire in 1880, and the patronage has sunk to a very low ebb by removals, there was no prospect for rebuilding. Acting upon the suggestion made by Dr. Beesley two years ago, this seemed to be the only proper course.

Five buildings are marked "poor," and three as "very poor," in the statistical report; ranging in value from \$250 to \$600 each. It is much to be desired that the people would supplant these with structures worthier of the high purpose to which they are devoted. Districts 24 and 25, in lower township, especially, ought to receive popular condemnation. If they would unite and erect a new house suited to accommodate them as one school, the quality of instruction could be improved, and the educational tone greatly elevated.

It could be devotedly wished that the suggestion in your last report might find legislative sanction, viz.: that trustees should be empowered to assess a small tax of \$50 or \$100 upon the property of the district for incidental purposes. As you say, if this privilege were granted, they "would be relieved of a great source of embarrassment, and the people of considerable trouble, and school

properties would be much better cared for." Now, left by the districts to depend entirely upon State funds, trustees are tempted to low contracts with teachers, and some are finding it difficult to employ suitable persons.

Most of the schools show decided progress, having had last year good work in the school room. Perhaps as much was accomplished as could have been expected, considering the facilities furnished. The new course of study was generally accepted. And, without exception, the schools took part in the annual examination, held the last week in March. Over three hundred certificates of merit were distributed, according to grade, and very few failures were observed among those taking part in it.

Diplomas were granted as follows: In No. 16, Cape May Court House, to Misses Lizzie Ogden and Leonora Bennett; in No. 27, Cape May city, to Misses Ella Taylor, Hannah Hand and Sallie Ware, and to Isaac Smith and Lewis Stevens. It is thought that such examinations stimulate study and arouse laudable emulation, thus tending to develop good citizens.

Teachers' examinations were held as prescribed by law in each quarter of the year. Of first-grade certificates, six were granted to males. Of second-grade certificates, six were granted to males and two to females. Of third-grade certificates, eight were granted to males, and twenty-four to females. There were six applications rejected, three of each sex. Including these, there are in the county fifteen persons holding first-grade certificates, fourteen holding second-grade, and thirty-two holding third-grade, terms unexpired. Messrs. Hand, Robinson and Vanamah kindly and with ability served as examiners last year, and will continue to do so.

During the holidays, in December, the Teachers' Institute was held at Cape May city throughout three days, and was well attended, both by teachers and citizens. Great interest was manifested in all the exercises, which were pleasingly conducted by Profs. Johonnot and Apgar. Mr. Harry Ludlam, teacher of elocution, gave practical instruction in the art of reading, and at proper intervals enlivened the exercises with interesting recitations of varied character.

Prof. Johonnot discussed the studies of the school-room, the true use of text-books, and their adaptation to the capacity of children; the development of mind, and the mode of teaching by object lessons. Prof. Austin Apgar was eagerly followed in his illustrated review upon the blackboard, of various methods in teaching grammar and arithmetic, showing the comparative loss of time that might otherwise be usefully applied in branches not commonly pursued in district schools. His enthusiasm was contagious, as he presented at length the interesting subjects of optics and

natural history, the former chiefly with reference to colors. He showed impressively the need of object lessons upon these topics, and urged strongly upon teachers the importance of introducing such and like studies in the school-room.

Large audiences were present during the delivery of two most admirable lectures; the first, on Tuesday evening, by Prof. Johnson, on "Good Literature for the Children;" the second, on "Rome," by the State Superintendent, Ellis A. Apgar. The latter with highly finished stereopticon views.

In the visitation of schools, all were visited twice, and some thrice, the teachers giving me a cordial welcome.

It is my sad duty to record here that my honored predecessor, Maurice Beesley, M. D., departed this life at his home in Dennisville, in January last, after weary months of suffering, which he bore with patience and fortitude. As one of the oldest and foremost citizens of the county, always prompt in matters pertaining to popular welfare, his name and memory will be long cherished among us.

CUMBERLAND COUNTY.

W. O. GARRISON, SUPERINTENDENT.

To E. A. Apgar, State Superintendent:

In obedience to law, I submit the following report of the schools of Cumberland county.

The work has gone quietly and harmoniously forward, and though we claim no monstrous strides, we do claim steady progress.

In one or two districts difficulties have arisen, these have been thoroughly investigated and settled in accordance with what seemed right and for the best interests of the schools.

School visits have been made as usual, and in these it has been the aim to encourage teachers and pupils and stimulate them to do their best work.

Teachers have many discouragements peculiar to their profession. Not least of which are low salaries and uncertain terms of position.

It seems almost unnecessary to say that schools should pay sufficient salary and make the terms of office sufficiently certain to induce the best talent to enter and remain in the teaching profession. It is equally unnecessary to say that they do not.

Teachers of talent and ability can make more money in other callings, and many of them drop out of the ranks, leaving their places to be filled by those who are inexperienced.

This would not be so much to be deplored if these would-be teachers were fitted for their work by a thorough normal training, but most of them have never even thought that there might be a science of teaching, much less have they made a study of the standard writers on Pedagogics.

If the standard of requirement for the third-grade certificate could be raised so as to require candidates to be at least two years older than at present, and to have a knowledge of the principles on which the science of teaching is founded, as also of the school law under which they propose to teach, it would be a great gain to the pupils who, under the present law requirements, have their studies directed by a master or miss of sixteen; or their time squandered by a school keeper who is learning to teach.

In the above remarks it is not my purpose to disparage the work of any particular teacher, but to call attention to an existing evil in the hope that some means may be devised of remedying it.

One of the hopeful signs is in the largely increased number of subscribers to professional periodicals. During the past year this number has increased five-fold.

Another is found in the large attendance at our last institute, which though held during the Christmas holidays was attended by ninety-four per cent of the teachers in the county.

The argument advanced, by those who oppose the yearly institute, that teachers do not care to attend them, was fully answered by so many teachers giving up their usual vacation to the institute work.

Our county course of study continues to produce good results. Were it not for making my report too lengthy, I would like to give the names of our graduates, many of whom deserve much praise for the diligence with which they have pursued the course of study.

District boundaries have been changed in some instances to enable the districts to change the location of their buildings, to more eligible sites.

The spirit of improvement seems to be abroad in the county, the following districts have either built new or remodeled their old buildings. Nos. 10, 14, 18, 28, 35, 38, 53, 55 and 58. The few houses marked poor, or very poor, will, I feel confident, be replaced with comfortable modern structures before I make my next report.

ESSEX COUNTY.

CHARLES M. DAVIS, SUPERINTENDENT.

To E. A. Apgar, State Superintendent:

SIR:—In obedience to law, I have the honor to make this report concerning the state of public instruction in Essex county, not including the cities of Newark and Orange.

There are in this county 36 districts, containing 40 school houses, under the charge of 129 teachers, 24 male and 105 female. For the year ending August 31st, 1881, there were 28 male teachers at an average salary of \$88 a month; and 94 female teachers at \$45.60. During the past year only 24 male teachers have been employed, but their salaries have averaged \$97—an increase of 10 per cent. The number of female teachers has increased to 105, with little increase of salary, the average being \$46. The schools have been open a little over ten months; only two having fallen short of this, from circumstances which the trustees could not control.

Two new school houses have been built at an expense of about \$6,000 each. Two have been enlarged, and the rest kept in good repair, except in the four cases which are marked "poor" in my statistical report. Of these "poor" ones, the citizens of one have voted money to purchase a lot and build a new house; one has resolved to build, but cannot as yet find a satisfactory location; the others are too poor to undertake such a work.

The census shows an increase of 213 children, between the ages of five and eighteen years. The school enrollment has increased 159, and the average attendance 209. The districts have voted over \$66,000 for teachers' salaries, for building, repairing and furnishing, and for general school and school-house purposes. This is ten per cent more than was raised for the same purpose last year.

These statements show that "the sentiment of the people regarding free public schools" is advancing, and is shown by their works.

The regular quarterly examinations have been well attended, resulting in the granting of 9 certificates of the first-grade, 8 of the second, and 49 of the third; a total of 66. Eighty-four candidates were rejected.

Of the 36 schools in the county, 11 are well graded, and 16 ungraded; the remaining 9 have each 2 teachers, with an attempt at grading, more or less successful. Three-fourths of the children are in the graded schools, under 93 teachers, most of whom have been trained for the special work of their respective departments. What was formerly known as "promotion" of teachers is not recognized here. If a teacher succeeds in her department, instead of being promoted to a so-called higher one, where she may fail, she retains her position with an increase of salary. So that as respects the character and value of the teacher's real worth, no one department is higher than another. The 16 ungraded schools, with 18 teachers, have the well-known features of the "district school;" the disagreeable lines are, however, becoming gradually effaced under the increased attention of more enlightened trustees. There are a few very poor districts, where the small salaries offered will not secure teachers of experience; yet in these same schools we find faithful work, and a corps of able teachers is being trained for future success in more remunerative fields. In each of the 9 "intermediate" schools there are two departments, one of which is, in most cases, altogether primary, and the teaching often approaches that in the regular primary classes of the well graded schools. But the other departments cannot be called graded, as the principal is compelled to arrange the studies of his pupils very much as is done in the ungraded "district school." It should be added that the citizens of these districts are as liberal, according to

their ability, in voting taxes for the support of the schools, as are the citizens of the larger and richer districts.

Four of the well graded schools have high school departments, in three of which pupils can be fitted for college; in the other a full preparation is given except in the study of Greek; this may be hereafter introduced, when the sentiment of the district shall require it. In two of these schools, also, special attention is given to the study of natural science and natural history. Physics and chemistry are taught in laboratories, liberally supplied with apparatus, which in one school is valued at \$1,800. Botany, mineralogy and geology are studied in the field, as well as in the class-room. It is not to be inferred that these are the only schools where these studies are successfully pursued; in many others excellent work is done in this line. But these districts have the advantage of being both rich and populous, so that enough pupils from the grammar departments can be retained to form classes in the High School.

It is gratifying to note, both among people and teachers, an advance of sentiment regarding school-room work. The people are becoming more appreciative, the teachers more ambitious. The earnestness of the latter is shown, not only by their presence at meetings of associations and institutes, and by their visiting schools that have a high reputation; but also by the fact that not a few of them were found during vacation at "summer schools," taking lessons in teaching from some of the best practical educators of the day.

During the year I have made 120 visits to schools, visiting (with one exception) every school twice, many of them three or four times. I have also attended meetings of trustees; and in several cases, meetings of the citizens, when it was thought that my presence and advice would help to increase the interest of the people in the education of their children.

It will thus be seen that the year has been one of marked progress in all respects in the schools of Essex county.

GLOUCESTER COUNTY.

WILLIAM MILLIGAN, SUPERINTENDENT.

To E. A. Apgar, State Superintendent.

SIR:—In obedience to the requirements of the law, I herewith respectfully submit my sixteenth annual report concerning the schools of Gloucester county.

There has been more trouble this year in receiving the reports from Trustees and Collectors than in any of the preceding years. Several of the District Clerks complain of having to make so many reports, and a number of the collectors have not yet reported.

SCHOOL HOUSES.—The school houses in Clarksboro and Bethel districts, Nos. 17 and 64, have been completed, and they are both supplied with modern furniture. Improvements have been made in Paulsboro and Clayton districts, and the school-house at Gibbstown has been re-seated with new and modern furniture.

In districts Nos. 15, 41, and 43, proper accommodation are needed for the increase of small children. Another room is wanted in each of the districts; and in No. 43 a building for the little ones should be erected in the grove near school No. 1.

SCHOOLS.—The regular course of study has been faithfully pursued in nearly all of the schools. The number of pupils that passed the final examination in all of the branches of the course was six, viz.: Ella Thackara, Virginia Maloney, Mary Taylor and Frank Patterson in Woodbury, District, No. 1; Laura Cowgill,

of Paulsboro, District No. 16, and Victor Smith, of Westville, District No. 61. Pupils passed in second-grade in Woodbury, No. 1; in Almonesson, No. 2; in Thoroughfare, No. 5; in Mantua, No. 9; in Paulsboro, No. 16; in Clarksboro, No. 17; in Cedar Grove, No. 23; in Harrisonville, No. 24; in Cooper, No. 40; in Glassboro, No. 41; in Clayton, No. 43; in Franklinville, No. 45; in Fries' Mills, No. 51; in Williamstown, No. 57. One hundred and two third-grades were issued.

Night schools were opened in Woodbury, Glassboro and Williamstown, for the use of those persons employed in the glass works, or who had not the privilege of attending the day schools.

TEACHERS.—The teachers employed in the day schools during the year number one hundred and twelve, thirty-eight gentlemen and seventy-four ladies. Eight were graduates of the State Normal School; eight had attended the Normal School; nine held State certificates; seventeen first-grade county certificates; twelve second-grade, and seventy-four third-grade certificates.

Four meetings of the Teachers' Association were held during the year, and they were all well attended. Valuable assistance and instruction were given at these meetings by Rev. Jesse Y. Burk, University of Pennsylvania; Prof. Pierce, of Pierce's Business College; Professors Hasbrouck and Apgar, of our Normal School, and Professors Haas and Lockwood, Superintendent of Burlington and Monmouth counties.

One hundred and thirty-three persons presented themselves at the different quarterly examinations for teachers' certificates, of whom eighty-four received certificates, and forty-nine were rejected. Four first-grade certificates were granted; three to gentlemen, and one to a lady.

Fifteen second-grades were granted, four to gentlemen and eleven to ladies. Sixty-five third-grades, seventeen to gentlemen and forty-eight to ladies. Of those that were rejected, twelve were gentlemen and thirty-seven were ladies. Those who were successful in receiving first-grades, were J. Harry Smith, Edward T. Taylor, Samuel Warrick and Belle Crater.

LIBRARIES AND APPARATUS.—The moneys received from the State for the purpose of establishing libraries have been properly expended, either for books or for apparatus. Thirty districts have availed themselves of the benefits derived from the Library Act, and in that way they have been enabled to supply themselves with either apparatus or books, and in some cases with both, which could not have been received in any other way.

CONCLUSION.—Early in the year the school-house for colored children in Small Gloucester was burned, and the children have been divided between Poplar Grove and Madison districts. All of

the schools were visited according to requirements, some more. There has been a great improvement in the work of the schools since we have had our "Course of Study."

HUNTERDON COUNTY.

R. S. SWACKHAMER, SUPERINTENDENT.

To E. A. Apgar, State Superintendent:

I have the honor to present my sixth annual report of the public schools of Hunterdon county.

The county embraces fifteen townships, two boroughs, one city, one hundred and five school districts, one hundred and eight school houses, and one hundred and forty-seven school departments.

The number of children between five and eighteen years of age, as given by the last school census, is ten thousand three hundred and sixty-five (10,365), the number enrolled during the year, eight thousand seven hundred and fourteen (8,714), and the average daily attendance, four thousand one hundred and thirty-one (4,131), or an increase on that of the preceding year of three hundred and fifteen (315), on the number enrolled, and three hundred and thirteen (313) on the average daily attendance—a result highly gratifying in view of the fact that there has been no increase during the two years in the school population.

SCHOOL HOUSES.—Two school houses have been erected during the year—one in the re-organized district No. 65 1-2, Mount Grove, and the other in No. 74, Pleasant Run.

These buildings are sufficiently large and commodious, with ample play-grounds attached, and are in every way suited to the requirements of the respective districts.

Of the one hundred and eight school houses, seventy-seven are furnished with the most approved modern desks and seats, while more than half of the remaining thirty-one have what may properly be termed semi-modern, there being at present very few of the old-time arrangements.

It may reasonably be expected, from the progress that has recently been made in this direction, that but a brief period will elapse before "Modern Desks" will be written opposite the name and number of every school-house in the county.

During the year now closing, the sum of \$6,727.32 has been raised by district tax for building, enlarging, remodeling, refurnishing or repairing school houses.

Thirty-three of the entire number rank as *very good*, forty-five *good*, twenty *medium*, nine *poor*, and one *very poor*. There is no reason why the last ten should not speedily undergo the necessary repairs, or give place to new ones better suited to the requirements of the districts.

SCHOOL FUNDS.—The school funds for the coming year vary but little from those for the year now closing, and are as follows:

State appropriation from the \$100,000.....	\$ 3,090 06
From the State school tax.....	49,965 32

Total from the State.....	53,055 38
Interest of Surplus Revenue.....	3,297 43

Total State and County Funds.....	\$ 56,352 81
-----------------------------------	--------------

Or \$16,962.93 more than the last apportionment (August 31, 1881) before the change in the law.

From these funds six districts, numbering below 45 children, receive \$200 each.....	\$ 1,200 00
Forty-five, numbering from 45 to 68, receive \$350 each.....	15,750 00
The remaining fifty-four, numbering respectively more than 68 (containing 7,710 children), receive per child (\$5.110611) a trifle more than five dollars and eleven cents....	39,402 81

Making the aggregate as above.....	\$56,352 81
------------------------------------	-------------

As stated in a former report, what is here given as interest of surplus revenue is simply an amount provided by the county (since 1878) equal to the annual interest on the surplus revenue received from the State in 1836-7.

The comparatively large apportionment of State school funds to Hunterdon county, resulting mainly from that provision of the law which secures to every county at least 90 per centum of the amount raised within its limits, has very materially improved the school finances of the county. The people have a right to expect a corresponding improvement in the condition of the schools.

TRUSTEES.—Trustees, with a few exceptions, have faithfully performed the duties of the office. Under their supervision, and to a great extent by their influence, two new buildings have been erected during the year, as before stated, while twenty have received important improvements, alterations or repairs.

Much care has been exercised in the selection of teachers, regard being had to character and culture, as well as to other qualifications.

EXAMINATIONS.—The quarterly examinations have been held at Flemington, the county seat.

One hundred and eighty-seven candidates have presented themselves during the year before the Examining Board. Of these, four have received first-grade certificates, thirty second-grade, and one hundred and sixteen third-grade, making a total of one hundred and fifty, while thirty-seven, or about 20 per cent. of the whole number, fell below the requirements and were rejected.

I am indebted to Messrs. Geo. Fleming and Oliver H. Hoffman for continued efficient services as associate examiners.

TEACHERS.—Of the teachers employed during the year, twenty-one hold first-grade certificates, forty-six second-grade, and eighty third-grade. Eighteen graduates and nine under-graduates from the New Jersey State Normal School are embraced in the above.

Most of the teachers have been doing good work, and the results have generally been satisfactory to the trustees and patrons of the schools. It may in justice be said that without the tinsel and trappings so often used to cover over radical defects, the school work has (with some exceptions which are always implied) come up to a fair standard of excellence, being thorough and practical, and suited to the requirements of the schools. It is proper to observe without any disparagement to our graded schools or larger district, that it is no uncommon thing to find a teacher in some out of the way, small rural district manifesting an energy and enthusiasm in the work that would be highly creditable to any school or school department in the county.

TEACHERS' INSTITUTE.—The Teachers' Institute for this county, held at Flemington on the 8th, 9th and 10th of May, was attended by nearly all the teachers of the county. Hon. E. A. Apgar, State Superintendent, was not able to be present, owing to circumstances beyond his control.

The exercises were mainly conducted by Prof. Heiges, of Lincoln University, Pennsylvania, and Prof. Houck, Deputy State Superintendent of Public Instruction of Pennsylvania, and were of the most instructive and entertaining character.

Among the subjects presented were the following: "How to Successfully Introduce the Natural Sciences into the Schools," "How to Teach History," "How to Teach Composition," "How to Guard Against the Abuse of the Organs of Sight," &c.

On Monday evening Prof. Houck delivered his lecture on "Mistakes in the School Room," and on Tuesday evening Prof. Heiges discoursed on "Dame Nature and Her Apparent Absurdities." The large attendance on both occasions, not only of teachers but of citizens of Flemington and vicinity, showed a due appreciation of institute work. The high expectations in regard to these able educators was fully met, and the universal expression seemed to be that the institute was a success.

School libraries have been formed or additions made to those already established in the following districts: No. 13, Bethlehem; No. 26, Milford; No. 30, Pittstown; No. 62, Fairmount; No. 83, Reaville; No. 88, Wagoners, and No. 93, Sand Brook.

The teachers in charge and by whose efforts, aided by the trustees and patrons of the schools, the necessary funds were raised, are Mr. A. G. Creveling, Mr. A. H. Vannatta, Mr. Hartwell Shepherd, Mr. George Thorpe, Miss Mattie Walton, Miss Sarah M. Cook and Mr. Hiram L. Fisher.

As illustrating the growing interest in this subject it may be proper to state that of the thirty-three libraries established in the county twenty-two have been organized since I entered upon the duties of county superintendent, and of the twenty-three additional installments, nineteen have been made during the same brief period. In most cases it has been thought best to use a part of the funds in furnishing the schools with necessary apparatus. The propriety of such a course cannot be questioned, and it is to be hoped that for the future a greater proportion of the money will be thus expended every teacher will do better work with a school properly supplied with charts, maps, globes, &c., than he can do without these useful appliances.

SCHOOL VISITATIONS.—More than the required number of school visitations have been made. These occasions have afforded abundant opportunity for witnessing the workings of the several

schools, as well as the condition of school houses and their surroundings, and for recording the results.

I beg leave in this connection to express my acknowledgements to trustees, teachers and friends of education generally, for the kindness, sympathy and encouragement received at their hands during the six years now brought to a close.

The readiness and promptness of the Hon. State Superintendent, E. A. Apgar, and his efficient Secretary, Mr. Betts, in all the official intercourse between this office and the State Department, have contributed very materially to render the relations of the most pleasant character.

I would also most sincerely thank the Honorable, the State Board of Education, for the renewed expression of confidence in electing me for the third time to the office of County Superintendent, although rejected by a majority of the Board of Chosen Freeholders.

While thanking my friends for the recent efforts in my behalf, as well as for the uniform good feeling and co-operation during the entire time of continuance in office, I feel an assurance that my successor, Mr. Oliver H. Hoffman, will have the encouragement, aid and support of all who feel an interest in our public schools, and who desire that the best possible results should be realized from the liberal provisions made for the education of all the children of the State.

HUDSON COUNTY.

WM. L. DICKINSON, SUPERINTENDENT.

To Ellis A. Apgar, State Superintendent.

The past year has not been a year of great strides in the progress of the schools. We can only give assurance of gradual systematic advancement and faithful work.

The table of statistics accompanying this report presents few points of marked increase when compared with the statistics of last year. The total number of teachers employed in the county is 516, which is 13 larger than the number of last year. The average attendance of pupils has increased from 18,916 to 19,168. The number of children enrolled during this year was 32,475; last year it was 31,943.

The whole number of children between 5 and 18 years of age residing in the county is reported 69,413; the number of last year was 62,035.

The seating capacity of the schools is only 75 larger this year than it was last. It is quite clear that the population of this county is growing much faster than is generally supposed, and that the school accommodations need largely to be increased. Stability or permanence of the corps of teachers, I reckon one of the necessary elements of regular and sure advancement of the schools. Frequent changes of teachers tend irresistably to destroy the interest of both parents and pupils in school work.

In this respect I have much cause to rejoice over our freedom from change. There are in the county 62 principals of schools and departments. In only three of these have there been changes of principals during the year. In District No. 8 the principal had

not received any salary for a year, and thinking he could not survive another year of such treatment he obtained an engagement in District No. 10, and left a district whose school he had ably managed for more than ten years.

The average salaries of the male teachers have been increased about four per cent. The salaries of the female teachers have not changed.

School District No. 9 has at last begun to erect a school-house. It will be finished early in the next school year. The district has never owned a school-house since its organization. It has for many years occupied by sufferance a small miserable frame edifice, of which, I believe, all were thoroughly ashamed. In District No. 6, more commonly known as Union Hill, the prospects are very fair for the erection of a new school-house during the next year. If in my next annual report I am able to state that districts Nos. 6 and 9 have at last furnished their children with good school houses, I think I shall be proud.

One more encouraging feature in the condition of school matters is the fact that we have three teachers' associations in the county, that meet monthly for mutual professional improvement. When I see teachers generally anxious to fit themselves by association and discussion for doing better work, I am sure the schools cannot be neglected.

I feel well satisfied with the progress made by the schools generally during the year now closed, and I am hopeful for the future.

MERCER COUNTY.

WM. J. GIBBY, SUPERINTENDENT.

To E. A. Apgar, State Superintendent :

It is my pleasure to present my fourteenth annual report as Superintendent of this county : and it is no less a matter of gratification that the steady and substantial onward progress of former years has not been missing in the one just closed. The sentiment that what we spend for education we save in the inevitable expense of bringing criminals to justice so thoroughly obtains among the thinking members of our community, that this burden is more cheerfully borne than we could reasonably expect. The free public school system of New Jersey is now most firmly established, and he who at this day dares raise his voice in opposition to it at once questions his own respectability and consigns himself to the rear rank of civilization. And even should we descend to a mercenary view of the situation, we would find argument to sustain the present condition of educational affairs in the fact that the standard of the school determines the market value of the lands of the neighborhood, for we are told that one of the very first questions asked by one in quest of a farm is, "What kind of a school have you?" The cities had long since become so thoroughly imbued with the spirit of educational excellence that the high attainments of their schools had resolved itself into a maxim, and he who would for a moment question the truth of the same would in the same breath subject himself to the suspicion that a Rip Van Winkle sleep had tattered his brain. It is an acknowledgement due to the cities, and particularly to those of the northern portion of our State, that to them we are indebted for our system of free public schools, both in their inception and accomplishment.

It is a matter of much regret that the Legislature does not give to the State Board of Education plenary powers, authorizing that body to enact ordinances for the entire control of the schools of the State, instead of passing desultory acts in relation thereto. In the former event every regulation would be a complement of every other regulation, and together the several appointments would constitute a systematic whole, perfect in all its parts and admirably adapted to the end desired; while now each act of the Legislature, although intended to make the law more efficient, is apt to be isolated in its provisions and incapable of execution without serious friction and consequent derangement of other provisions of the general law. The judicious exercise of the large powers already conferred upon the State Board demonstrate in the results attained the wisdom displayed in granting those powers, and warrant the conferring of others ample for all purposes.

The work of the teacher has advanced to the dignity of a profession, and like all the other professions, it should be treated in a manner recognizing that dignity, and encouraging its members to sustain a high degree of excellence in its pursuit.

The fact that the teacher possessed of the first or second grade county certificate thereby commands a higher salary even in the same school stimulates him to strive for a higher grade. Certificates of the first grade have been issued during the year to the following candidates with the appended averages:

Sadie A. Pembroke.....	87
Lida Lawrence.....	88
Hannah A. Collins....	75
Mary G. Leach.....	96
Eseck H. Carner....	93
Alvin Blackwell.....	80

And second grades to—

Ella H. Matlack.....	82
Louisa W. Berrein.....	89
J. E. Sheppard.....	89
Mattie M. Martin.....	76
George W. Babcock.....	81

There were during the year one hundred and six certificates granted, viz.: six first grade, five second grades, and ninety-five third grade. Thirty-eight candidates, or more than one-third of those presenting themselves for examination, were rejected.

The sources of income are as follows:

APPENDIX TO SCHOOL REPORT.

State School Tax.....	\$70,833 37
State Appropriation.....	4,622 13
Interest.....	975 11
Total.....	<u>\$76,430 61</u>

All departments of school work are in such excellent condition that it is hardly possible to discriminate between them.

MIDDLESEX COUNTY.

RALPH WILLIS, SUPERINTENDENT.

To E. A. Appgar, State Superintendent :

More difficulty and delay than usual have been encountered in getting the annual district reports, especially that containing the items of attendance and the financial statement. This inconvenience has resulted, it may be presumed, from the necessity of using separate blanks for what was formerly contained in the several divisions of a simple blank.

Two new school houses have been erected during the past year. Nos. 41 and 51 displacing dilapidated and worn out structures with neat and respectable buildings. The school houses built within the last fifteen years, thirty in number, and the improvements made from time to time, in those erected at an earlier date leave very few school buildings in the county for the poor list. Conspicuous among these, because "set on a hill," is No. 1st, which, besides a shabby exterior, is too small for the number of pupils in attendance—crowding them together under a very low ceiling, and with-

out proper ventilation. Strange to say, No. 14 is among our best taught schools—the only instance, so far as I know, of a good school in a poor school-house.

The duties of my office have received most of my time and attention. The usual number of examinations have been held, with results as reported; township Boards of Trustees have been met, and business transacted; all the schools of the county have been twice visited, with sometimes an exception, necessitated by bad weather and bad roads in Winter, and the too early closing of some schools in Summer.

The monthly meetings of the Teachers' Association have been attended with a goodly number, and the exercises have been of an instructive and useful character.

I regret to state that no definite action has yet been taken by the Board of Chosen Freeholders regarding the surplus revenue. The matter, when presented to the Board a year ago, was courteously received, and referred to a committee for investigation, but no report has yet been made. The facts in the case are too plain to be reasonably questioned, and it is hoped that suitable action will be taken to secure to the schools of the county their rightful claim.

MONMOUTH COUNTY.

SAMUEL LOCKWOOD, SUPERINTENDENT.

To E. A. Apgar, State Superintendent :

SIR :—It is herewith my privilege to render you the report which the law requires. As the data on which the district appropriations of the school moneys is based are not yet understood by many, even including some school officers, a summary is here given of the essential facts which govern the distribution for Monmouth county for the current school year :

APPORTIONMENT OF SCHOOL MONEYS FOR MONMOUTH COUNTY

for the year beginning Sept. 1st, 1882, and ending August 31st, 1883.

Number of children in the county according to Census of 1881.....	18,093
Interest from surplus revenue.....	\$ 3,527 48
State appropriation from the \$100,000	\$ 5,388 76
Appropriation from the \$4, or State School Tax.....	\$ 71,252 63
Total amount of School Moneys.....	\$ 80,168 87
Number of districts having 82 children, or less, and receiving each \$350.....	39
Number of children in these 39 districts.....	2,430
Amount apportioned to the above children....	\$ 12,452 38
Average per child, for the above.....	\$5 12-4518
Number of children in the remaining districts which number more than 82 children each.....	15,663
Amount from all sources to each child in the above districts.....	\$4 24-70

The above is an improved showing, for which we are grateful. It is not pleasant to state that this increase had become too necessary. The attraction of the shore boroughs with their chartered privileges and enlarged opportunities of more profitable employment, is telling disastrously on the rural district by rapidly reducing many to the so-called \$350 districts. This year has actually put four below the minimum of forty-five children, and two others stand at forty-six, while others are quite low. For all this there is no remedy, although it may prove the proper policy to disband two of those whose census has fallen below the number of forty-five.

It should be worthy of congratulation that the district clerks have never failed me in the matter of their annual reports. Alas! in one instance that phenomenon has come to pass at last. However, at cost of labor and the annoyance of delay, I got the needed statistics from other sources, and so have saved my report in its integrity. It seems to me that the law requiring the taking of the school census in May of each year, which is excellent, renders necessary some modification of Section 93, as the effect seems virtually to make null all the puritive force which that section of the law may have contained.

A desire is expressed for information in this part of my report on the material prosperity of our county on its educational line. The first assessment of the valuation of all the public school property in Monmouth was made in the "inflation days," and it footed

\$60,000, all told. Another assessment taken when property had shrunk to its intrinsic value, made it \$50,000. I cannot recall a single public school property that was worth over \$1,500. There was not a graded school in the county. The idea was almost regarded as utopian. To-day the county has at least nine schools of an average value of \$2,500, and seven whose average worth is \$5,000, two which average \$11,000, four with an average value of \$22,000. Before this paragraph gets into type the true valuation of the school property in Monmouth county will be \$310,000. And this takes no note of the existance of thirty-six district libraries, and thirty-one sets of metric apparatus. All this is of the sort that does not come without being sent for. This generous spirit has come by bringing the community to school to learn the needs of the great present. To such a point the people have been educated. But one must not speak of the many private conferences with leading citizens—nor of the night addresses to make men think—nor of the much matter prepared anonymously for, and most generously published by the press of Monmouth.

No. 94 1-2 at Ocean Beach, which is really a new school, has voted \$1,200 for enlargement. The Asbury Park school district, No. 90 1-2, has voted to enlarge their beautiful building, also to erect a grammar school on the Ocean Grove side of the district, and to build a school for the colored children, for all which \$15,000 are provided. No. 94 is just completing an edifice at a cost of \$6,000, upon a fine plot, the munificent gift of Joseph N. Tuttle Esq., President of the Howard Saving Bank, Newark, N. J. This gentleman's generosity enabled me to harmonize the district which had got into a disagreement in respect to the location of the building, and feeling had risen so high as to put in imminent peril the entire project. This action of Mr. Tuttle, so princely and timely, deserves to crown the "almond blossoms" with the golden halo of a grateful and imperishable memory.

Some years ago, grieved with the indifference of the colored people of Brown's Point and Matawan in respect to the education of their children, I sought to stir up interest by working on an original line. Their invariable averment was that they would send their children to school if I would give them a school of their own. I called together the trustees of three contiguous districts, and had a conference with them. They assured me that no obstruction had ever been put in the way of these children attending the white schools. "The simple fact was they would not attend them." These boards three agreed and accepted with unanimity the proposition that if I would get a place and organize a school for the colored children, and see that it was run efficiently, they would submit to an assessment upon their several

funds for its support, it being understood that any one board could on due notice given to the County Superintendent withdraw from the compact, in which case the entire agreement would cease. This arrangement proved to be a great blessing, and for twelve years the school had grown in popularity. To my sorrow, a paper was served on me by a majority of the trustees of No. 48, asking to be allowed to withdraw from the covenant, on the ground that the number of colored children in their district had become so small that the assessment was in excess of the good obtained ; and they thought they could do as well for them in their own school. Of course this was a settlement much against my own wishes, and to the grief of the colored citizens the school was disbanded and the children directed to go to the respective white schools.

The commodious new colored school-house at Fair Haven has done a year of right good work. The citizens are proud of it, and the encouragement given the teacher by their pastor has greatly strengthened her hands. It must be mentioned that the singular success of this school is due not a little to the kind attentions given it by General Clinton B. Fisk and his excellent lady.

The figures are curious in respect to population and attendance. The census of children of school age has fallen off 116, while the enrollment of attendance has increased by 433. This last is in the face of the fact that much interruption has been given to our school work by the presence through the county of contagious diseases among the children. The new school census is 17,977, and the number enrolled in attendance 12,340. As the teaching of reading must form the secular part of Sunday school work it is interesting to know that about 9,000 children have attended such schools in our county.

On the peninsula of Sandy Hook is a small military community some miles away from the school on the mainland. Though treading on Uncle Sam's territory, yet with the commendable aid of Mr. R. R. Proudfit, the scholarly district clerk of the Highland School, No. 67, we found a lady suited to the work, and a school has been carried through the year with quite satisfactory results. The teacher, Mrs. Sarah Johnson, I am glad to say, is re-engaged, and I believe that the first year's work though so good, will be excelled by that of the second year.

Next to material prosperity comes the internal condition of our schools. This is manifestly in a healthy and progressive state.

The attendance is increasing, and the work is solid and well done. It can hardly be otherwise. The County Institute as now conducted is a sure gauge of the capacity, and quality of our teaching resources. Our institute was held in December at Keyport.

The gathering was so large and the make-up so intelligent, as to greatly impress the community. It was felt to be a duty for each one to be there, and all the time, and while there to work and learn. It was a successful local Normal School. An old school officer of much intelligence and of large experience, attended every meeting, and offered the resolution that hereafter the institute devote a portion of its time to the instruction of school officers. The motion was put in good faith and carried. It showed the impression made upon a practical business man of large school official experience.

The year herewith reported has been one of interruptions. My health is not the best, and a long persistence of varioloid, and other infectious diseases of children, have made much school visiting imprudent. But my office has been so occupied with critical cases—in fact, in the office and out, my time has been so taken up with the necessities and misunderstanding of school officers, that it has become to me a source of gratefulness that every case has been adjusted well, as I believe the results show. With heart and strength given wholly to the work, I thank God for the fair fruits the field has yielded. The visitation officially of school officers has been extensive. The township visitations of trustees has been entirely worked over; and of the one hundred and sixteen boards of trustees, direct personal conference has been had with all. I can only reiterate that the work of Monmouth county is peculiar, that its office work is not only heavy but very often perplexing to to a degree.

MORRIS COUNTY.

LEWIS W. THURBER, SUPERINTENDENT.

To E. A. Apgar, State Superintendent:

SIR:—In accordance with the requirements of the school law, I herewith present my annual report of the public schools in Morris county for the year ending August 31st, 1882.

The district clerks have not made their returns with their usual promptness. Indeed, three of these officials have failed, as yet, to send in their annual reports, although I have written them urging haste in the matter. This has had the effect to retard, somewhat, this report, and to make it slightly incomplete. I am glad to report the township collectors as being more prompt—all but one having reported.

I am unable to chronicle anything indicating great gains or losses as compared with last year. In a well established system like ours, this is not to be looked for, and yet the appended statistical tables are a record of substantial growth, which warrants us in saying that the year just closed has been a prosperous one to the school interests of Morris county. The following comparisons will fully show this :

Our school census, this year, is 14,221 against 14,120 reported last year, showing an increase of 101. I believe this enumeration to be in excess of any heretofore made.

In the number of children enrolled in our school registers, our figures make a loss of 114; but this loss is only an apparent one, for we find a gain of 149 is given in the number attending private schools, while the average attendance shows an increase of 414. Taking these facts into consideration with the additional one that the number of children reported as having attended no school has been reduced by 197, we feel that we have cause for encouragement and congratulation. The time that the schools have been kept open has been prolonged nearly two-tenths months.

The condition of our school buildings is, on the whole, very satisfactory. Dover, No. 1, is adding four class rooms to provide for its increasing population. The addition is of brick, and is put on as a front to the old building. Architectural beauty as well as convenience and adaptation to school work has been studied, and the plans show that the interior arrangements are in harmony with our best modern school houses. The whole building is to be heated with steam, and a new system of ventilation will be introduced. Port Oram, No. 9, has completed its building, and is in possession of a house in which its citizens take an honest pride. I am pleased to report that Rockaway, No. 13, has at last decided to have a new school-house instead of the two buildings that have so long done service. The new structure is to be of brick, two stories in height, and is to contain six class rooms, with ample cloak, toilet, library rooms, etc. A steam heating apparatus is to be put in, and every needful convenience will be supplied. No expense will be spared to have this edifice rank among the first in the State. The completion of this house will insure a first-class graded school instead of the two mixed schools heretofore maintained.

The Mount Hope Mining Company proposes to erect a new school-house similar to those of Port Oram and Lower Hibernia, for the accommodation and education of the children of its employes. This house is much needed, and will reflect much credit to the above mentioned company.

Districts Nos. 28 and 87 have reseatd their respective school rooms, and have taken out the old back-breaking, chest-contracting, round-shoulder-producing benches, replacing them with comfortable modern seats and desks.

Do not the reports on ventilation show that mental culture is being obtained at the expense of physical?

A most encouraging sign of the times is the desire on the part of Trustees to secure better teachers. Now that an increased school fund has relieved the districts from their former straitened circumstances, a request is made for something superior to the former cheap teacher. The supply of this better class of teachers is not quite equal to the demand.

In my visits to schools, I have labored earnestly to impress teachers that the present demands of the school room require something better than mere routine work; that they should awaken and inspire the young minds committed to their charge and lift them above the repressing effects of meaningless repetitions and parrot-like recitations. In short, I would have my teachers something more than lesson-hearers. I would have them teach.

The quarterly teachers' examinations have been held at the prescribed times. During the year 192 candidates presented themselves for licenses to teach. Of this number 74 failed to meet the requirements of the State, and were refused certificates. Nearly all of these rejected candidates were young people who had never taught.

The Teachers' Annual Institute was held at Dover in December last. The attendance was large, and the exercises were both instructive and practical. No one who is conversant with school work, and whose opportunities for observing the effect of these institutes upon the schools are frequent, can doubt the beneficial provision of the school law which affords instruction to the teachers at so slight an expense. Our rural schools are, of necessity, supplied with teachers whose advantages for gaining advanced ideas and methods are limited to a very few sources, among which the teachers' institute ranks first in importance.

Circumstances have required that three and even four visits to schools were necessary in a few districts, hence the whole number has been in excess of the demands of the law.

Permit me, in conclusion, to thank you for valuable assistance rendered in times of need.

OCEAN COUNTY.

E. M. LONAN, SUPERINTENDENT.

To E. A. Appgar, State Superintendent :

SIR:—In obedience to law, I have the honor to make the following report :

Serious and protracted illness prevented me from making my usual number of visits.

Trustees invariably take considerable interest in our schools, and I received a letter a few days ago from one of the trustees, stating it was important to secure competent teachers, and offering to contribute liberally out of his own pocket.

Our school houses are in a very good condition. Dover Chapel has placed the school building in very good shape, thus lessening the number of school houses in our county marked very poor. We now have only two houses marked very poor.

Barnegat has built a much needed extension to her school house, and in future will employ three teachers.

Examinations have been regularly held. I still retain my very efficient Board of Examiners. I am succeeding very slowly in getting up maps of our different school districts. The work is of considerable magnitude, and is really about the most difficult work I have yet encountered since entering on my duties. We have hundreds of acres of wild lands that neither assessor nor any other township officer can tell who are the owners or what township they lie in. To illustrate: About thirty years ago I purchased some land at administrator's sale, indefinitely described as a certain tract in the neighborhood of the duck pond, and I still have the land, but I have yet to see the man who can point it out to me, so you can see what a very difficult matter we have to mark out boundaries

of a school district. I have made up my mind to have them fixed up in some manner. The different assessors and other intelligent gentlemen have aided me, so I am in hopes to be soon able to submit the map for your inspection and approval.

From present appearances Barnegat City will soon be a place of some importance. The children from there are now numbered in the Waretown district. As they cannot cross the bay to attend school, they draw a small portion of the money and raise by subscription enough to employ a teacher for at least six months in the year. The teacher "boards around." I presume the day is not far distant when they will form a district by themselves. I think Ocean county, as regards our schools, will compare favorably with any county in the State. The number of successful applicants for teachers' certificates for the year ending August 31st were seventy-five. Total number of rejected applicants were forty-five.

In conclusion I wish to render thanks to my many friends in the county for their co-operation in school matters, and to Prof. Apgar for valuable aid often needed and cheerfully rendered; also to Mr. Betts, his very able and genial assistant.

PASSAIC COUNTY.

J. C. CRUIKSHANK, SUPERINTENDENT.

To E. A. Apgar, State Superintendent:

The time for the annual review of school progress has arrived. Gather up the fragments—make the record—the county interest in free schools—the efficiency of teacher—school accommodations and personal labor.

The schools were opened the first Monday in September, 1881 Teachers re-engaged with one exception—a smiling messenger to

them of good and satisfactory work. Another of the county teachers has been advanced to a principality in the city of Paterson. Thus it is, the city raids on the county. It has captured six of the county teachers and honored them with sovereignty. During the year only one Board of Trustees changed their teacher. The teachers, with this exception, closed their schools in the school-room in which they began. Forty-four received teachers' credentials. Twenty-two failed. Why? They were thrust into the examining room through the persuasion and flattery of friends; "they had education and tact sufficient to take charge of a school, could they be licensed."

The salaries of the county teachers are not sufficient compensation, and a way should be devised to increase them. It will diminish zeal in work and adherence to the good cause. If reduction is to continue, the best and most efficient will seek more profitable employment. Commend them. They cling to the schools with conscientious faithfulness, hoping for a change to their favor. It would be to their advantage to mingle more with their patrons and have familiar intercourse with pupils apart from school hours. The number of male teachers employed, thirty-eight; females, one hundred and forty. It is about as one teacher to one hundred and thirty children (130).

The number of children of school age is twenty-one thousand eight hundred and sixty (21,860), an increase of (1,440) fourteen hundred and forty.

The school registers show an increase of (1,177) eleven hundred and seventy-seven. The average attendance, an increase, of five hundred and eighty-nine (589). But the number attending no school (5,637) is five thousand six hundred and thirty-seven, being (290) two hundred and ninety more than in 1881. Visitations to the schools and departments during the year have been (108) one hundred and eight. With one or two exceptions teachers are truly interested in their work and efficient. It must be trying to body and mind to toil day after day in the school, known as being the room, destitute of school accommodations. When spoken about, it is only by way of reproach and contempt.

The County Institute was held in the city of Paterson, April 26, 27 and 28, the city board tendering the best of accommodations. All the teachers were present. Instruction was given by Prof. Houck, of Pennsylvania, and by Prof. French, of Massachusetts, on reading, orthography, elocution, geography, sanitary mode of constructing and ventilating school rooms, difference between the old and new mode of teaching, gentlemen well adapted to institute work.

The county teachers' association has been maintained, attended by a few earnest workers. In the profession there are those who are filled with self-sufficiency and centralized in views and aims to live in the limited circle of self. But the full development of the educational system and the desire to excel allows the considerate to join the teachers' association and tend to add additional vitality and respect to their usefulness and position.

Passaic has added another school house, making four for its two thousand and seventy-two (2,072) school children. There are three or four localities in the county in which new school houses would be improvements. The people are refined, locations beautiful, agricultural pursuits profitable, but the "old, worn out school houses" are not in keeping with the good character of the people. Great, good and lasting influence are produced by suitable school houses properly furnished.

The United States intrusted in 1837 the surplus revenue to the States, and the State of New Jersey intrusted its portion to the counties. The interest has for the first time, by the Board of Chosen Freeholders, been added as a supplement to the county school fund \$1,168.38.)

The State contributed its portion of funds to furnish libraries to school districts. Nos. 4, 5, (6 stolen), 12, 13, 14, 15, 18, 32, 34, and to nine schools of No. 35 (Paterson).

With emotions of sorrow I record the death of Prof. S. W. Rice, who was an adornment to his profession and greatly esteemed by his co-workers. He gave system and character to the educational interest of Passaic City. For twelve years he was a member of the county examining board. His name will be held in sweet remembrance. Sympathy is with the widow and fatherless. His end was peace. "Asleep in Jesus."

I tender my thanks to friends, school officials and teachers for their encouragement, courtesy and support, and hope the present may be more in its educational progress than the past.

SALEM COUNTY.

R. HENRY HOLME, SUPERINTENDENT.

To Ellis A. Apgar, State Superintendent :

In accordance with the requirements of law, I herewith submit the following report.

During the past year the work in our schools has gone on in quiet and harmony. Few decided changes have been made, yet on the whole, our efforts have tended in the direction of sound progress. The operation of the new law changing the mode of raising revenues for the support of our schools has been very beneficial. This law has relieved us, in most cases, from the necessity of raising special taxes for teachers' salaries, and has thereby removed one constant source of trouble; it has enabled many districts to pay better salaries, and thus employ better teachers; it has increased somewhat the time of keeping open the schools so that it reached the average of nine and one-half months. This ought to be sufficient time to accomplish some perceptible results, and it has so done. Our yearly examination in all the schools of the county affords some test of our work and our progress, and I am happy to say that it gives satisfactory evidence that we are constantly doing more and better work. We have more gradnates; more pupils taking second-grade certificates, and in many of our schools more instances of zealous work on the part of pupils. I have but one doubt about the effects of this system of examination. I am not sure that the fear of failure or the desire for success, the rivalry for high grades or the pushing forward of precocious minds, does not have its counterpart in impaired health, in physical and nervous debility. Not particularly in this county, but throughout the country, physicians are calling attention to this danger, and as a precaution, I shall issue a circular, cautioning teachers against undue stimulus and overwork.

Throughout the county there have been many improvements in our school buildings. In District No. 14 the old house which has been the source of so much contention and which has been a standing disgrace to the community, has at last been replaced by a neat and comfortable new one. District No. 49 has also built a substantial new house. Centreton and Swedesbridge having been united, have purchased ground in a central location and have nearly completed a good brick building. Other districts have enlarged and refurnished their houses, and at least one other contemplates building a new one; indeed, had it not been for a misapprehension of the new law for securing land, it would have already been built. Whether intentional or not, this law allows them to hold their meeting for this purpose only at the time of the regular yearly meeting. Inasmuch as a rainy night or a dozen unlooked-for contingencies, by preventing the assemblage of a majority of the legal voters, may defeat the wishes of the community, it would be wise to amend it so as to hold meetings under its provisions oftener than once a year. Altogether, the desire for better houses and the disposition to provide them when needed, in connection with the sound financial condition of all our districts, augers well for future improvement.

Excepting the fact that there was considerable complaint from those who can send their children to school only during the Winter, our Teachers' Institute was a success. Prof. Austin Apgar's instruction was of great service to our teachers, and his illustrated lecture highly commended by the community. Superintendent Woodruff also did good work. Our thanks are hereby tendered to them for their efficient services.

Not being altogether satisfied with our attainments in the four fundamental processes of arithmetic, I visited during the year the Pittsburg schools, so noted for their skill in that direction. I found wonderful proficiency, indeed, but no royal road to its attainment. Only intelligent, thorough drill, combined with a perfect knowledge of all the combinations in addition as well as those of multiplication, can give a mastery of the work. Since nine-tenths of the ordinary business of life calls only for proficiency in addition, subtraction, multiplication and division, and since much time can be saved by quick work therein, I am turning the attention of our teachers somewhat in this direction. I meet with a prompt response from them and hope for great improvement.

SOMERSET COUNTY.

J. S. HAYNES, SUPERINTENDENT.

To E. A. Apgar, State Superintendent:

In comparison with the school census of last year, this county shows a decrease of three hundred and twenty-two children between the ages of five and eighteen.

Last year the schools were kept open nine and eight-tenths months, this year ten and nine-hundredths, making a difference of about six days in favor of the present year.

The average daily attendance this year has been twenty-four hundred and twenty-seven; last year it was twenty-four hundred and thirty-three. But twenty-four hundred and twenty-seven on the basis of the present census, and the increased monthly average makes a better showing than twenty-four hundred and thirty-three on last year's census and monthly average. These figures indicate progress in the amount of work done in the schools during the year, and they would have been largely increased, but for the losses which many of the schools suffered from illness among their pupils. Besides malaria and diphtheria, a malignant type of measles swept through some of the schools like a besom of destruction. In one room of the Raritan building the attendance dropped within a fortnight from seventy to twelve, in another from sixty to fourteen. On the eighth of May Laura Lane died, on the nineteenth Lela Smith, on the twenty-second Jennie Gainer, and on the twenty-fifth Annie Hutchinson; four of the most interesting, faithful and intelligent pupils ever enrolled upon the registers of the Raritan school. "Death loves a shining mark." This fatality has had no parallel in any other district, though the

decrease in attendance from the tenth of May to the middle of June was very great in many of the rural schools.

It gives me pleasure to report that the teachers have generally been industrious and faithful, and that for their encouragement there has been a general advance in salaries all along the line. The average monthly salaries of male teachers have risen within the year from \$41.44 to \$45.88; those of female teachers from \$28.58 to \$31.88. An average gain of nearly four dollars a month on every teacher's salary list throughout the county is one of the most gratifying results of the recent change in the school law.

In a considerable number of districts, unusual efforts have been made within the year to diminish truancy and to increase the regular attendance; and where the parents have done their duty the results have been very encouraging. But parents generally are entirely too negligent in discharging this important obligation to their children and the State. The slightest excuse or pretense on the part of a child is too often sufficient to secure from indulgent parents exemption from school duty. And then those parents will complain that "their children don't learn." They have no right to complain; they have no right to commit this crime against their own offspring, and against the State, whose liberal provision for the education of all the children within her borders entitles her to expect from them good citizenship in the years to come. How often in my visits to the schools has my heart been pained by the beggarly array of empty benches, which might have been full but for this criminal negligence, and my sympathy aroused by the appeals of faithful, competent teachers for more pupils.

An unhappy controversy has for several months existed in District No. 50, concerning the clerk's accounts. The decision of the State Department in this case, that a District Clerk cannot be ignored, has evoked the suggestion that the law should be so amended that one member of a Board of Trustees shall no longer have more power than the other two.

The annual Institute was held in the Somerville public school building, on the tenth, eleventh and twelfth of May.

The instructors were Professors Heiges and Houck, from Pennsylvania.

A prominent feature of the proceedings was the writing by the teachers of questions concerning teaching and discipline, and the answering of them by Prof. Heiges. He proved to be an excellent instructor, with a well stored mind and an admirable manner.

Though the weather was stormy, the meeting was a decided success, all present being pleased, profited and encouraged to do more and better work than ever before for the benefit of their pupils.

Willow Grove and Bound Brook have been united, under the name of Bound Brook School District, No. 31. The new district has voted \$10,000 for the purchase of a lot and the erection and furnishing of a new school building. North Plainfield has voted \$25,000 for the same purpose, and has already broken ground for the new building on Somerset street.

SUSSEX COUNTY.

LUTHER HILL, SUPERINTENDENT.

To E. A. Appgar, State Superintendent :

The annual report of the condition of the public schools in Sussex county for the school year ending August 31, 1882, is herewith transmitted.

The value of school property has increased three thousand dollars. The school census is one hundred and ninety-eight less than the previous year, and twelve hundred and sixty less than the census of 1870. There is an increase in the number of children enrolled in the school registers, with an encouraging decrease in the number who have attended no school.

One hundred and one districts have kept their schools open nine months or more during the year, and the remaining five districts are but a fraction under nine months—a better result in this particular than ever before reached. The average time the schools have been kept open is nine and four-tenths months, being an increase of four days over last year.

Nine districts have been consolidated or taken up during the year, leaving the number of districts six less than last year.

Three of the districts, with a total census of 49, were united. Their joint average attendance was 19, and the value of all the

school property in the three is reported at \$75. The act of uniting them cannot result in much loss, and will save the township in which they are situated, \$200, and the county, \$250 annually.

The average monthly wages of male teachers is increased \$4.64, and of females \$2.60 over last year, being \$27.58 for males and \$27.55 for females.

Two new school houses have been erected, and several others have been furnished with improved seats or otherwise repaired.

Sanitary measures have been somewhat neglected, and the recent circulars of the State Board of Health will furnish timely suggestions to trustees and teachers upon this most important matter.

The Teachers' Institute held in May last was a complete success. Most of the teachers of the county engaged in teaching and many expecting to become teachers were present. Others, who had temporarily or permanently retired, but whose hearts are in the work, encouraged us by their presence and assisted us in the exercises. The efficient instructors, Profs. Henry Houck, Assistant Superintendent of Public Instruction in Pennsylvania, and S. B. Heiges, A. M., of Lincoln University, Pa., secured for us by State Superintendent Apgar, gave universal satisfaction.

At the close of the Institute the teachers of the county organized a Teachers' Association which bids fair to become a useful factor in imparting instruction and increasing the power of the teachers.

Excepting when temporarily closed at the time of my visit, I have visited all the schools but one twice or oftener during the year, and, with a few exceptions, I have been fully satisfied with the work of the teachers. In many of the schools the grade has been materially raised, and I can recall but one or two cases where there has been a decline.

UNION COUNTY.

N. W. PEASE, SUPERINTENDENT.

To E. A. Apgar, State Superintendent:

In preparing this, my fourteenth annual report to you concerning the public schools of Union county, much satisfaction is felt.

The sentiments of the people in favor of free public schools, ever active and pronounced, have been developed and strengthened in many ways during the year. Indeed, through the past decade, at least, the tide of public feeling, thought and sentiment has set steadily in that direction, till all classes hold nearly the same opinions. A healthy feeling of emulation is abroad, and the endeavor to elevate the standard of teaching and to push each school forward to the highest point of excellence attainable is everywhere manifest.

This interest is shown so plainly one cannot mistake it. All the districts in the county save three raise special taxes for the support of schools, and many order special taxes expressly for the payment of teachers' salaries. Districts hitherto content with an ungraded school and one teacher have liberally provided an assistant. Other districts employing two teachers, not satisfied that the two "can manage somehow," though overburdened, have wisely determined to employ additional help. Nine or ten districts, acting on the line of true economy, have raised funds in order to furnish text-books and all school supplies to pupils free of charge, except in cases of wilful or unnecessary damage, and others contemplate doing so another year. In delicate attentions to teachers, rendering school rooms and school grounds pleasant and attractive, co-operating with teachers in matters of discipline, instruction and attendance, the interest of the people is further evidenced.

The efficiency of our teachers is conceded by all. A large majority of those thus employed have engaged in the work with

strictly professional views and motives, proposing to make it a life work. It is the aim and purpose of school officers to encourage and employ only such. True, many appear before the County Board of Examiners, pass the required grade and obtain certificates; but this signifies nothing unless they have the talent to teach, and purpose making a business of it, earnest, continuance, faithful. Thus thinking and discriminating, school officers are steadily promoting the efficiency of the corps of teachers. Another fact: We believe the lowest primary classes in our graded schools should have the benefit of the best talent and skill that can be found. Thus that position is made an honorary one, and instructors peculiarly fitted for it are employed with adequate compensation. With correct discipline and training here, all things considered, we need have little fear for the future of the child. Having acted from these convictions, we already begin to reap the benefits anticipated.

The condition of school accommodations is good, but, in most districts, insufficient, as was clearly shown in last year's report. True, in some instances, school rooms have been remodeled and new seats procured, still the accommodations are not equal to the demand. Not an old or "poor" school-house remains in Union county, the last one being replaced by a new brick edifice; yet were a compulsory school law enforced, our deficiencies in this line would be painfully apparent.

Many improvements have been made during the past year, or provision made for them. Linden, No. 1, has furnished the means for repairing and painting school buildings and fences, also for beautifying the grounds, and an additional teacher has been employed.

East Linden, No. 2, has painted, repaired and thoroughly renovated the school-house, and planted shade trees. South Roselle, No. 4, has also painted school-house, out-buildings and fences, put in new heating apparatus, and made other repairs and improvements. At Cranford, No. 9, extensive improvements have been made, rendering the school buildings, grounds and surroundings strikingly beautiful and attractive. It is especially gratifying to witness such evidences of taste, care and thought for the comfort, pleasure and training of the children. Often trustees and taxpayers seem to forget that beautiful surroundings are as much needed in the culture of children at school as they are at their homes. Not so at Cranford. At Scotch Plains, No. 14, also much has been done in a neat and substantial manner, painting, remodeling school rooms and supplying new furniture.

Another teacher has just been engaged for the coming year. As at Cranford, so here the outlook is very promising. The new school-house at Feltville, No. 16, has been completed and furnished

ready for the new year. Solon, No.17, though the last to abandon the old school-house, is not least. Funds have been liberally provided, and a new brick school-house, two stories in height, is in process of erection. The honor of being in the rear guard does not in the least detract from her merits. Nobly has the district done—all honor to her in doing away with the last “poor” school-house. In former years it has been a pleasure to note the annual improvements made at New Providence, No. 18. During the past year the old standard has been maintained. An additional teacher has also been employed there. The school buildings and accommodations at Summit, No.19, are surpassed by none in the county. The liberality of the people and the trustees seems to be inexhaustible. The prospects of this school for the next year are most promising. At No. 20, East Summit, a new well has been dug, a neat, substantial fence erected, the school buildings painted, and shade trees planted. Long needed repairs and improvements have finally been made at No. 27, Connecticut Farms, adding much to the appearance and convenience of the school premises; and another teacher has been engaged for next year. The Trustees at Lyons Farms, No. 28, have also employed another teacher. Thus the good work goes on; three schools, hitherto having only one teacher each, are now all supplied with two. One other district ought to follow the example at once.

The work of the Superintendent has been greatly increased during the past two years, especially during the past year. Quarterly examinations have been held as required by law, at which 110 applicants for teachers' certificates presented themselves. The number reaching the standard required was 70; 12 first grade, 21 second grade, 37 third grade. Thirty applicants were rejected. Applicants residing in other counties have, with two exceptions, been denied examination; and those two have not received certificates. The aim has been to make the examinations critical and thorough, yet just and fair to every candidate. Schools have been visited and inspected regularly, and a careful record of each visit prepared. At least fifteen more visits have been made than the law requires.

The course of study adopted in 1880-81, has continued in force; and in May a written examination was held in all the schools save one on the same days. The papers were then collected and forwarded to the County Superintendent. As there were several thousand papers in all, it was not possible for one to examine them alone; hence the Superintendent selected ten principals of schools to assist in the work. To these gentlemen, Messrs. Fort, Knowles, Brower, Elston, Town, Kennedy, Schnyler, Woodruff, Brown and Wright, the Superintendent is deeply indebted for their willing

and valuable assistance. He also gratefully acknowledges the kind letters and words of approval and encouragement received from them and others. As a result of the examination, 182 certificates of merit of the primary grade, 67 of the grammar grade, and 10 diplomas of the high school grade were issued. Much time, thought and labor were devoted to this work; but, voluntary though it is, the whole system has the unqualified approval of teachers and school officers. Suffice it to say, one of the graduates of an ungraded school, No. 27, enters Rutgers College honored with a State scholarship. Other work is being prepared by the Superintendent with the view of preventing the circulation of that base literature so much sought by the pupils of our schools, especially by boys, by recommending a course of reading wholesome and elevating, upon the completion of which the pupils shall be entitled to some suitable testimonial.

The Annual Institute held May 1st, 2d and 3d, was eminently pleasant and profitable. The instructors, Messrs. Houck and Heiges, filled up nearly the entire time in presenting themes full of thought and valuable instruction adapted to our teachers. All that they presented was practical, and cannot fail to lead us to improvement in our school work and methods of teaching.

In closing, it is fitting to add the names of those receiving diplomas this year, as follows:

Nina Munoz, Cranford, No. 9,	C. Y. Brown, Principal.
Lillie A. Littell,	" " " "
Carrie Bindenberger,	" " "
Minnie E. Wagner,	" " "
Jennie Denman,	" " "
Lizzie Hollingsworth, Scotch Plains, No. 14,	Irving P. Town, Princ'l.
Lottie Lyon,	" " " "
Bessie Barrell, New Providence, No. 18,	J. W. Kennedy, "
Robert Barrell,	" " " "
Joseph A. Headley, Conn. Farms, No. 27,	A. W. Wright, "

WARREN COUNTY.

ROBERT S. PRICE, SUPERINTENDENT.

To E. A. Apgar, State Superintendent:

In addition to the statistical report of the public schools of the county of Warren, I have the pleasure of submitting the following statement of their general condition.

The statistical report which has been compiled with care from the reports of the District Clerks and Township Collectors gives a correct exhibit of the financial condition of our schools, the value and condition of school property, the number of children enrolled in the county, and a statement of attendance during the school year.

The school census was very carefully taken this year, and you will see, by referring to the report, that we number ten thousand five hundred and twenty-five children, between five and eighteen years of age, being an increase over the number reported last year of one hundred and sixty-three.

At the commencement of the year, the schools opened with a large attendance, under favorable circumstances, and we hoped to be able to report an increase in attendance over the previous year; but, owing to the prevalence of small-pox, scarlet fever and other contagious diseases in the county, the attendance was greatly reduced. In Oxford, where small-pox prevailed to a great extent, during the Winter and Spring, the school was closed for nearly three months, and the number that attended six months, but less than eight, was only thirty-one; the average attendance, during the time the school was kept open, was only one hundred and fifty-one, being much less than that reported last year. In Belvidere scarlet fever prevailed for more than two months, on account of which the schools were kept open only eight months, and the gene-

ral average only two hundred and thirteen. In Washington the school was closed for two weeks on account of sickness; scarlet fever being the prevailing disease. In Phillipsburg and Hacketts-town, the schools were kept open ten months; but the attendance part of the time was small. In the smaller districts the school sessions were continued with very few exceptions, the full time required by law; but the attendance, in many of them, was not as large as usual.

I have not succeeded in completing a map of the districts, but have secured the boundaries of a number of them, and hope to be able, with the valuable assistance freely given by the district clerks, to prepare such a map during the next year, and have a copy of it filed in your office. I see the great need of this work being finished as soon as possible, and am surprised that it has been so long neglected. It should have been one of the first things done, after the schools were organized, under the present school law. I find it a difficult matter, in many cases, to establish the lines; and with my other duties constantly employing my time, this important work cannot be accomplished as soon as I should like to have it.

Our school buildings are most of them furnished with modern desks, and, with a few exceptions, are in good condition. Many of them have, during the year, been repaired, and supplied with new black-boards, and other school furniture. In some of the districts, where we have been compelled to report the buildings very poor, they have decided to erect new ones; and in other districts extensive repairs are in contemplation. There is a progressive spirit manifested in regard to school property; the trustees and patrons of the schools take more interest than ever before in keeping the property in good repair, and in providing the schools with all necessary apparatus.

While we are making advancement in this direction, we hope to be able to continue the work until all the schools in the county are provided with good buildings, and suitable furniture, calculated to protect the health of the pupils, and assist in their mental improvement.

The regular quarterly examinations have been held during the year, and one hundred and fifty-five certificates granted. Nineteen of the first-grade, thirty-five of the second-grade, and one hundred and one of the third-grade. The total number of applicants rejected was sixty-eight. There were ten more of the first and ten more of the second grade certificates granted this year than last; and eleven less of the third grade; this shows more efficiency on the part of the teachers and will be sure to result in the improvement of our schools.

The County Teachers' Institute was held at Phillipsburg on the 14th, 15th and 16th of December, and was very largely attended, about ninety-five per cent of the teachers answered to roll call at each session; and they all gave close attention to the instruction imparted by the conductors. The exercises were conducted by State Superintendent Apgar, and Professors Heiges and Johonnet, and were of a practical and instructive character. The institute was said by many to be the largest ever held in the county, and was well calculated to encourage and aid the teachers. Institutes properly conducted are of great advantage to our schools, and should be held at least once a year in each county. In visiting the schools I was gratified to find many of our teachers successfully employing the methods taught at the institute, proving their practical value to the cause of education.

Over one hundred and fifty school visits were made during the year, and, with scarcely an exception, teachers were found faithfully performing their duty; and the many perfect recitations to which I had the pleasure of listening, proved satisfactorily the efficiency of their work. In my school visitations, the cordial manner in which I was received by the teachers, scholars, and school officers, made it the most pleasant part of my labors.

Some of our graded schools are holding annual commencement exercises, and are awarding diplomas to each member of their graduating class. At Phillipsburg, Washington and Hacketts-town the commencement exercises were of a very interesting character and were very largely attended by the friends of the schools.

Owing to sickness in the districts no commencement exercises were held in Oxford or Belvidere.

These exercises are of eminent value to our public schools, and have a tendency to raise them to a higher standard.

I met, by appointment, the Township Boards of Trustees and the Township Collectors during the month of August. In most cases I found their records properly kept, and that they had faithfully performed their duty.

An effort will be made during the next year to secure for the benefit of our schools the interest on the surplus revenue. They are legally entitled to this money, and we hope to obtain it for them without trouble.

The total amount of State school money apportioned to Warren county for the year commencing September 1st, 1882, is \$49,346.63, received as follows:

Amount received from State School Tax was.....	\$46,260 45
Apportionment from the \$100,000 State Appropriation	3,086 18

Amount apportioned to each child from the \$100,000.	.297836
New rate per child in districts receiving more than \$350 each.....	3.850762
Number of children in the county according to school census of 1881.....	10,362
Number of children in districts receiving more than \$350.....	6,182
Number of children in districts receiving \$350.....	3,844
Number of children in districts receiving \$200.....	366
Number of districts in the county.....	88
Number of districts entitled to \$350 each.....	62
Number of districts entitled to more than \$350 each..	16
Number of districts entitled to \$200 each.....	10

In conclusion, permit me to extend thanks to you and to all others who have rendered me assistance in the performance of my official duties.

Statistical Report, by Districts, for the County of ATLANTIC.

FINANCIAL STATEMENT.

TOWNSHIPS AND DISTRICTS OR CITIES.		Amount of appropriation from State appropriation, including two mill tax and \$10,000.	Amount of appropriation from township tax.	Amount of appropriation from surplus revenue.	Am't of district school tax voted for payment of teachers' salaries.	Amount of district school tax voted to be used for building, purchasing, hiring, repairing or furnishing public school houses.	Total amount of district school tax ordered to be raised.	Total amount received from all sources for public school pur- poses.	Balance in the hands of the Col- lector, exclusive of money for building and repairing purposes.
